SAST

Meeting records  Transcript  Recording

Summary

The team aligned on digital strategy and portal development for the upcoming board presentation and launch.

Digital Strategy and Architecture

The team adopted a digital prototype website to replace static presentations. They unified branding under the SA Film Academy master brand with dedicated subsidiaries.

Infrastructure and Security

Technical infrastructure leverages a global edge network to ensure performance and data security. The board approved the system to protect sensitive intellectual property and trainee data.

Growth and Governance

Management finalized a 12-month marketing calendar and AI-driven content strategy. Leadership established approval workflows to maintain oversight of automated systems and brand voice.

Rate this Summary: [Helpful](#) or [Not Helpful](#)

Decisions

ALIGNED

- **Slide target audience wording updated** The target audience text on the presentation slide is updated to 'trainee stroke aspiring film practitioners' to more accurately reflect the target demographic.
- **Gender representation in imagery balanced** The selection of imagery is modified to balance gender representation, ensuring the visual content is not male-dominated.
- **Slide title changed to 'Who are we here for?'** The slide title is changed to 'Who are we here for?' to explicitly address the organization's relationship with its stakeholders.
- **Renaming 'sinence' to 'SA film intense'** The platform/entity formerly known as 'sinence' is officially renamed to 'SA film intense'.
- **Entity relationship terminology updated** The terminology describing the relationship between organizational entities is changed from 'strangers' to 'subsidiaries' to emphasize their cohesive nature.
- **Slide text updated to remove unnecessary word** The slide text is updated to read 'Who we are, what we do' and the word 'actually' is removed for conciseness.
- **Presentation flow set to start with mother entity** The presentation structure is set to begin with the mother entity (SA Film Academy) before explaining the other four sub-entities.
- **Content and executive voice attribution** The executive visibility and marketing content strategy will be attributed to the CEO first, followed by the SA Film Academy team.
- **In-house podcast production integration** The organization will implement an in-house podcast as part of the marketing strategy, leveraging existing studio access for production.
- **Mandatory AI curriculum implementation** An AI curriculum will be established as a mandatory component of the organization's delivery strategy to support both internal and external workflows.

We've **updated the Decisions section** using your feedback.

Let us know what you think: [Helpful](#) or [Not Helpful](#)

Next steps

- ☐ [Jabulile Christina Dladla] Update Terminology: Change the trainee label to Trainee and Aspiring film practitioners to ensure correct terminology.
- ☐ [Jabulile Christina Dladla] Balance Images: Adjust photo selection and phrasing to ensure better gender representation across all slides.
- ☐ [Jabulile Christina Dladla] Add Posters: Replace current scrolling text with high resolution posters for Devil Peak and Blood and Water.
- ☐ [Jabulile Christina Dladla] Build CMS: Develop and provide a content management system to allow for website editing without coding by Monday.
- ☐ [Jabulile Christina Dladla] Update Description: Rephrase the subsidiary description to emphasize coherence instead of referencing them as strangers.
- ☐ [Jabulile Christina Dladla] Brighten Images: Increase the brightness of current photos to improve overall visibility.
- ☐ [Jabulile Christina Dladla] Enable Security: Implement password protection and administrator approval features for the board presentation site.
- ☐ [Jabulile Christina Dladla] Add Visuals: Insert additional images into text-heavy sections to improve readability and visual engagement.
- ☐ [Lindi Ndebele-Koka] Send Brand Manual: Provide the current brand manual for integration into the marketing strategy documentation. Use this document as the primary reference for visual elements and branding guidelines.
- ☐ [Jabulile Christina Dladla] Share Youth Photo: Send the Empower Youth event image to the CEO for approval. Use this photo to replace the current placeholder in the marketing presentation.
- ☐ [Lindi Ndebele-Koka] Send Partnerships List: Provide a comprehensive list of strategic partnerships for inclusion in the presentation materials. Ensure all key alliances are captured for the growth engine section.
- ☐ [The group] Implement AI Curriculum: Incorporate an artificial intelligence curriculum into the training program immediately. Develop this module as a key differentiator for the academy.
- ☐ [Belinda] Share Instrument Details: Present specific institutional instrument details during the upcoming board meeting. Assist the team by sharing relevant capabilities regarding current project goals.

- ☐ [The group] Release Portal Beta: Release the beta version of the portal before the software launch. Execute this phase between June and August to test features and perform necessary corrections.
- ☐ [Jabulile Christina Dladla] Coordinate IT: Collaborate with the IT company to manage backend technical requirements. Work with the team to ensure technical systems are properly streamlined.
- ☐ [Jabulile Christina Dladla] Provide Budget Breakdown: Generate a detailed breakdown of subscription costs for the project. Explain specific expenditures to provide transparency on the monthly budget.
- ☐ [Lindi Ndebele-Koka] Pay Invoice: Process the 8,500 payment for the work completed to date. Complete this transaction to officially wind off the current strategy phase.
- ☐ [The group] Conclude Strategy: Finalize the remaining strategy discussions. Conclude all planning sessions on Monday.

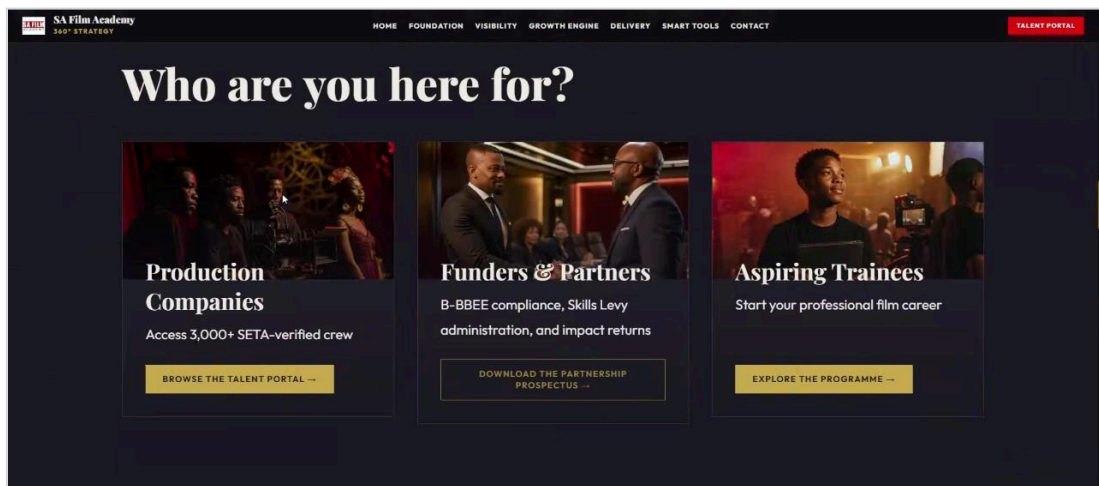

Details

Did the screenshots in this section make your notes [better](#) or [worse](#)?

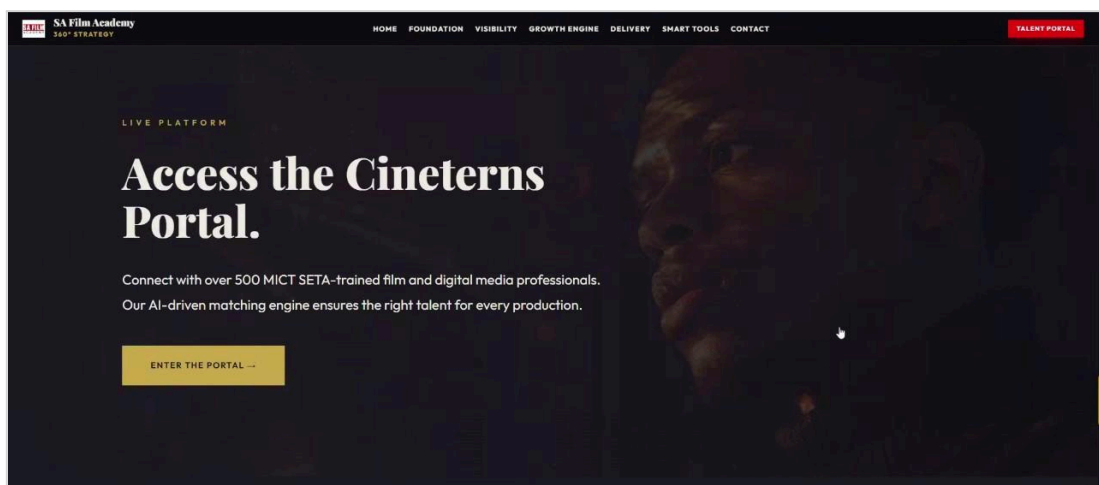

- **Meeting Concept and Digital Strategy:** Jabulile Christina Dladla and Lindi Ndebele-Koka discussed transitioning from traditional PDF or PowerPoint presentations to a digital prototype website for the upcoming boardroom meeting on June 20th ([00:01:07](#)). Jabulile Christina Dladla emphasized that the presentation style should reflect the Academy's digital focus, noting that good practice dictates sharing an agenda two weeks before major meetings ([00:04:11](#)).

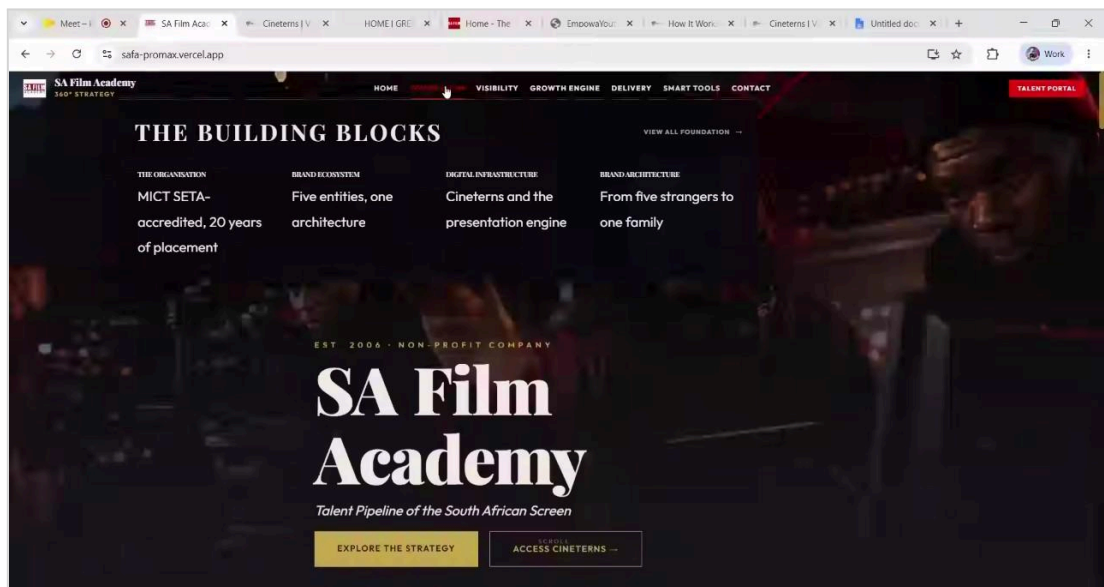

- **SA Film Academy 360 Marketing Strategy:** The team is moving away from bombarding stakeholders with static documents, choosing instead to use an actual website as a prototype to provide a more interactive and engaging experience. They reviewed the homepage layout, noting that some images and links currently act as placeholders and will be finalized before the presentation ([00:05:24](#)).
- **Target Audience and Imagery Adjustments:** Jabulile Christina Dladla and Lindi Ndebele-Koka reviewed the "Who are we here for?" section, deciding to target both trainee production companies and aspiring film practitioners ([00:06:30](#)). Lindi Ndebele-Koka noted that the initial slide imagery appeared male-dominated, and Jabulile Christina Dladla agreed to adjust the visual balance to be more representative ([00:07:47](#)).

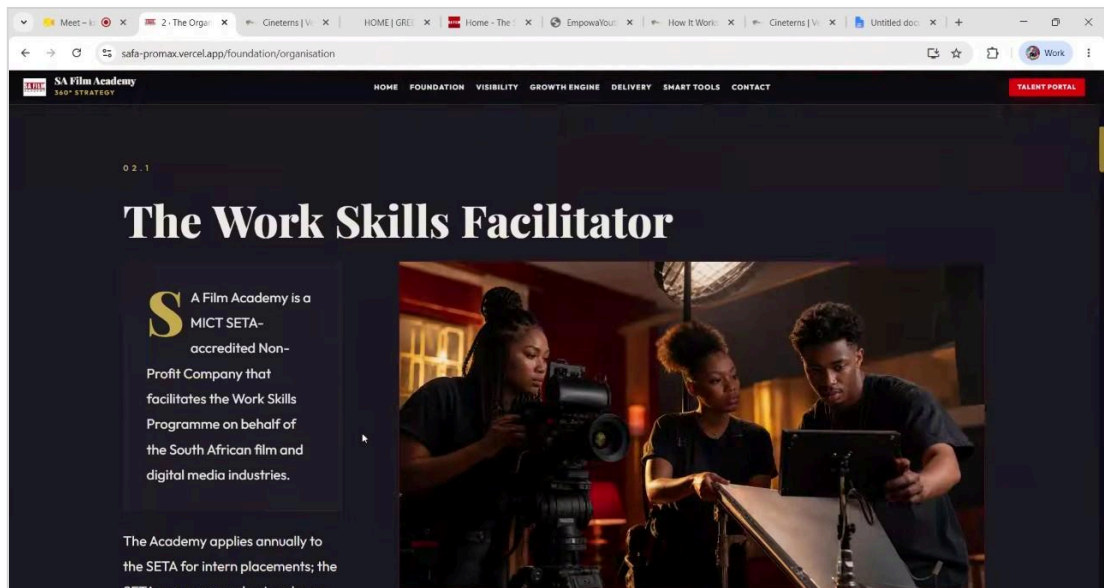

- **Naming and Rebranding:** The participants agreed to rename the entity previously referred to as "Sinence" to "SA Film Intense." This working title is intended to create a coherent identity for the digital talent portal ([00:12:11](#)).

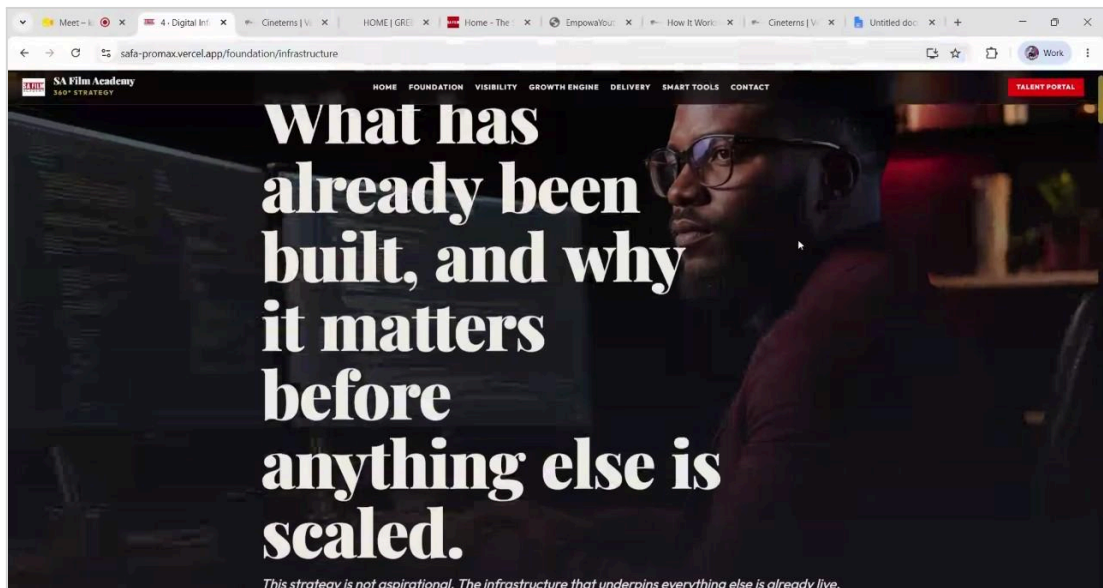

- **Digital Portal Demonstration:** Jabulile Christina Dladla demonstrated the "Enter the Portal" function, which leads to the SA Film Intense platform. The design incorporates cinematic movement and high-resolution visuals as part of their new presentation standard, which also links to social media and existing blog posts ([00:14:42](#)).
- **Foundation Pillar Overview:** Jabulile Christina Dladla explained that the website architecture is categorized into specific pillars. The "Foundation" pillar includes four key areas: the organization, the brand ecosystem, digital infrastructure, and brand architecture, which serves as a landing page for the broader presentation ([00:17:42](#)) ([00:20:23](#)).

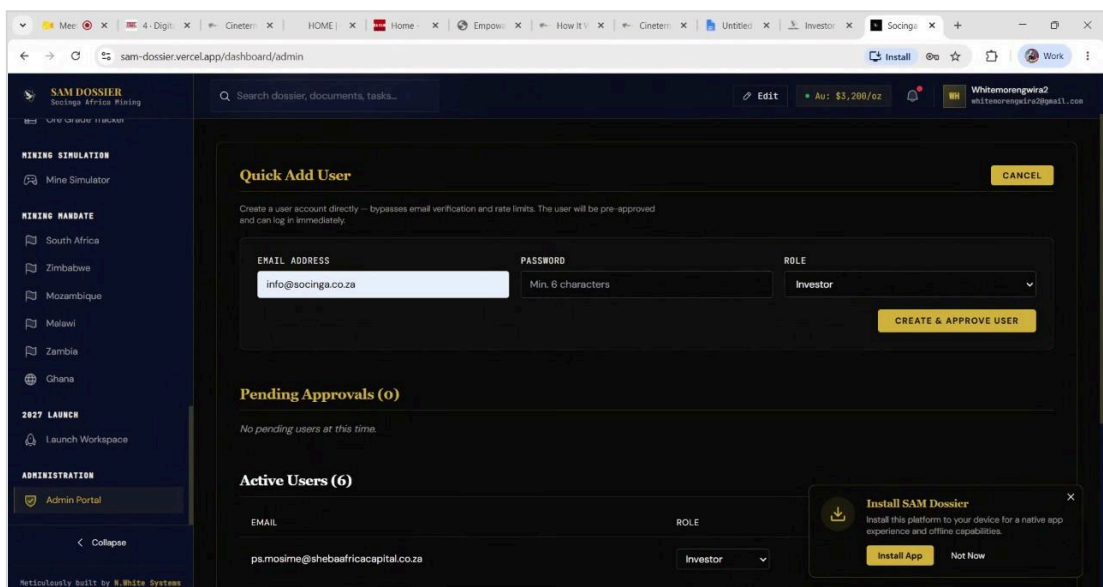

- **Organizational Content Refinement:** Lindi Ndebele-Koka requested text changes to the "Organization" section, specifically to frame it as "Who we are, what we do," and to use the phrase "shifting the perception" ([00:21:51](#)). Jabulile Christina Dladla agreed to brighten the cinematic, dark-themed imagery to ensure text remains readable and to add more photos to prevent the presentation from appearing text-heavy ([00:23:19](#)).

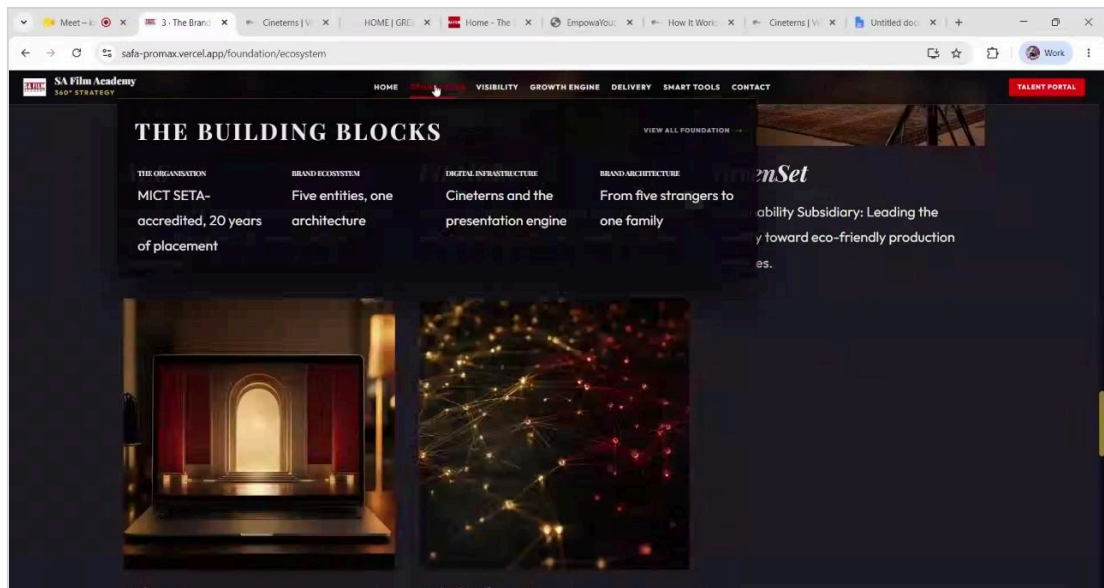

- **Content Management System (CMS) Development:** Jabulile Christina Dladla is building a CMS for the SA Film Academy. This software will allow the team to edit the website content directly without needing to manage code, with the system expected to be ready by the following Monday ([00:26:42](#)).
- **Brand Architecture and Subsidiaries:** They discussed restructuring the brand ecosystem from five "strangers" into five unified subsidiaries under one master brand. The master brand, SA Film Academy, acts as the mother entity for subsidiaries like ACE, Film Grow, and SA Film Intense, ensuring they all share a cohesive look and feel ([00:27:53](#)).
- **Digital Infrastructure Strategy:** Jabulile Christina Dladla provided a technical overview of the infrastructure, which utilizes a tech stack including Next.js, Vercel, and Cloudflare. This setup is designed to be secure and capable of handling global traffic with high performance ([00:34:36](#)).

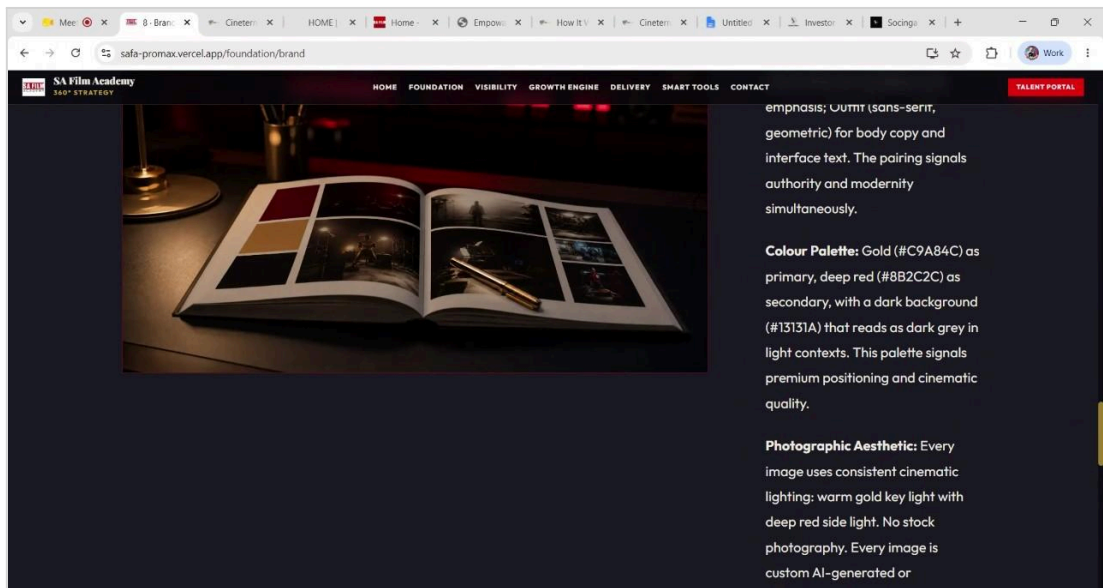

- **Security and Data Protection:** A significant focus was placed on security, specifically protecting trainee data and preventing hacking. Jabulile Christina Dladla demonstrated how to implement password protection and role-based access (admin, viewer, etc.) to ensure that highly confidential board documents and IP remain secure (00:37:28).

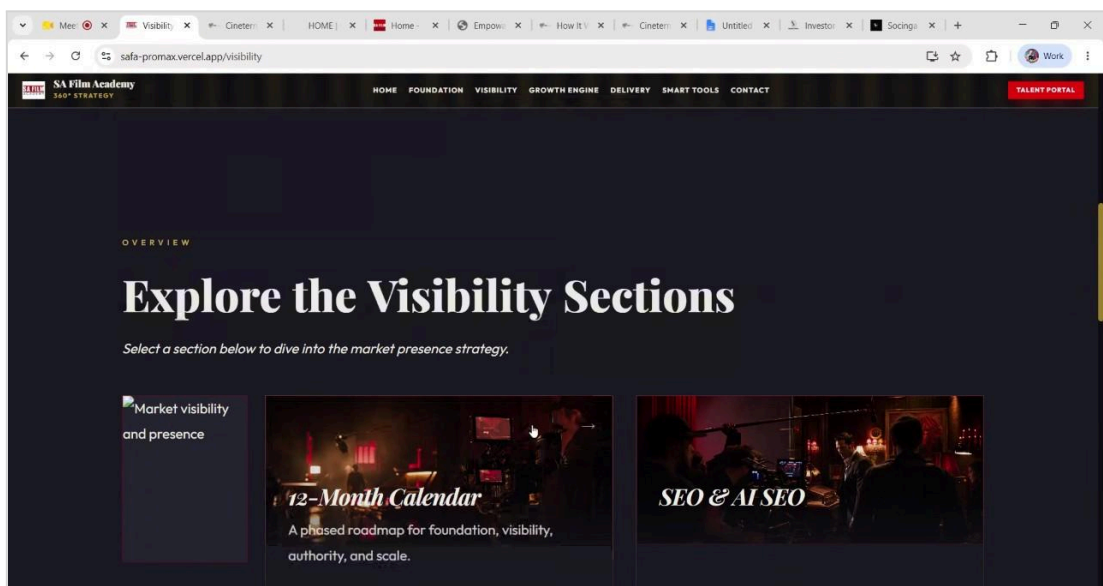

- **Operational Reality and Monitoring:** Jabulile Christina Dladla clarified that the infrastructure is not just a theoretical plan; the core components are live and operational. They discussed the ability to monitor the system's status in real-time, functioning similarly to an alarm system for the website's digital presence (00:44:18).

- **Placement Pipeline and Dashboards:** The discussion covered the technical aspects of the placement pipeline, including trainee profiles and agentic matching. Jabulile Christina Dladla proposed creating a mini control center using an inexpensive computer and TV screen to track real-time Sitta approvals and other notifications ([00:46:35](#)).
- **Sitta Integration and Administration:** Lindi Ndebele-Koka explained that formal Sitta communication is currently managed by their Skills Development Facilitator (SDF), who receives all necessary notifications. Jabulile Christina Dladla noted that they would look into using API keys to link Sitta's system to the Academy's dashboard where appropriate ([00:49:11](#)).
- **Global Edge Network and Compliance:** The website infrastructure leverages a global edge network with over 275 data centers, ensuring low latency and data redundancy. The system is compliant with South African data protection standards, with all sensitive placements encrypted end-to-end ([00:50:18](#)).
- **Brand Voice and Visual Guidelines:** The team agreed on a brand voice that is authoritative, locally focused, and data-driven. Jabulile Christina Dladla will incorporate the formal brand manual once provided, but is currently using a consistent cinematic lighting style and custom AI-generated imagery to maintain visual uniformity ([00:53:46](#)).

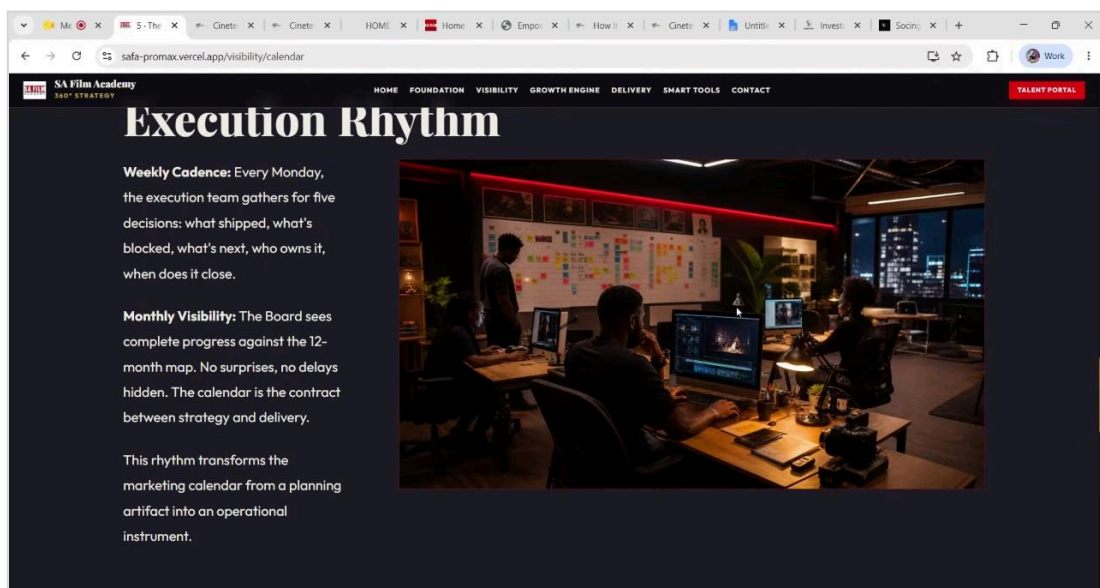

- **Transition to Visibility Pillar:** The meeting concluded with a transition to discussing the "Visibility" pillar, which outlines the strategic approach to SEO, content marketing, and institutional leadership ([00:57:40](#)).
- **12-Month Calendar & Beta Launch:** Jabulile Christina Dladla outlined a 12-month marketing calendar running from June 2026 to May 2027, organized into four phases to ensure visibility for the SA Film Academy. The implementation includes releasing a beta version of the SA Film Academy portal between June and August 2026, targeting a minimum of 50 profiles to present a functional prototype to the board ([00:59:03](#)).

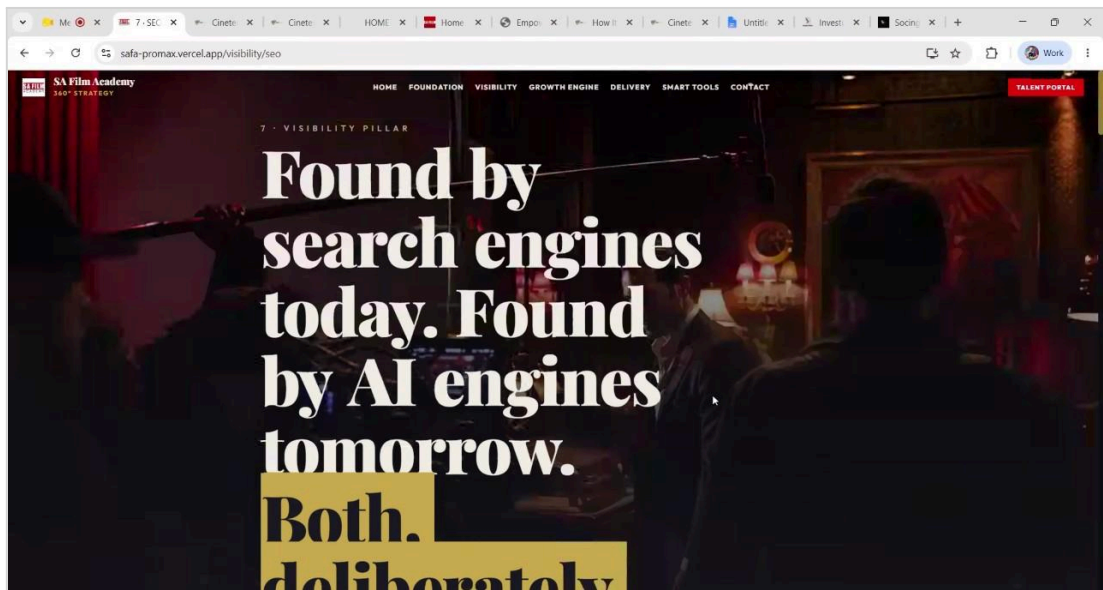

- **Content Strategy & Authority:** Jabulile Christina Dladla proposed a content pipeline beginning in September and October 2026, which includes launching

an in-house podcast and utilizing articles to discuss the film industry. The strategy focuses on building institutional authority through case studies and industry recognition, with a goal of scaling to 500+ profiles and achieving tier-one client growth ([01:01:55](#)).

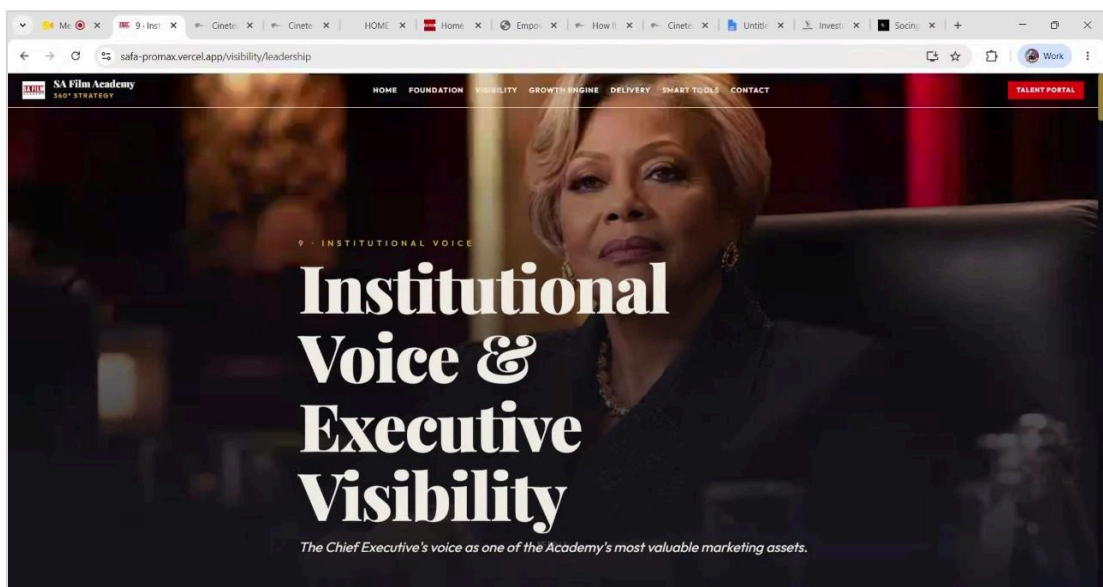

- **Execution Rhythm & AI Reporting:** To maintain operational control, the team will implement a weekly rhythm involving an execution team that meets every Monday to review shipped items, blockers, and next steps ([01:01:55](#)). Jabulile Christina Dladla explained that Agentic AI will handle reports for various platforms—including LinkedIn, Greenstone, and Suzuki—and provide data directly to the CEO, Lindi Ndebele-Koka, to ensure the board receives regular progress updates without surprises ([01:03:23](#)).

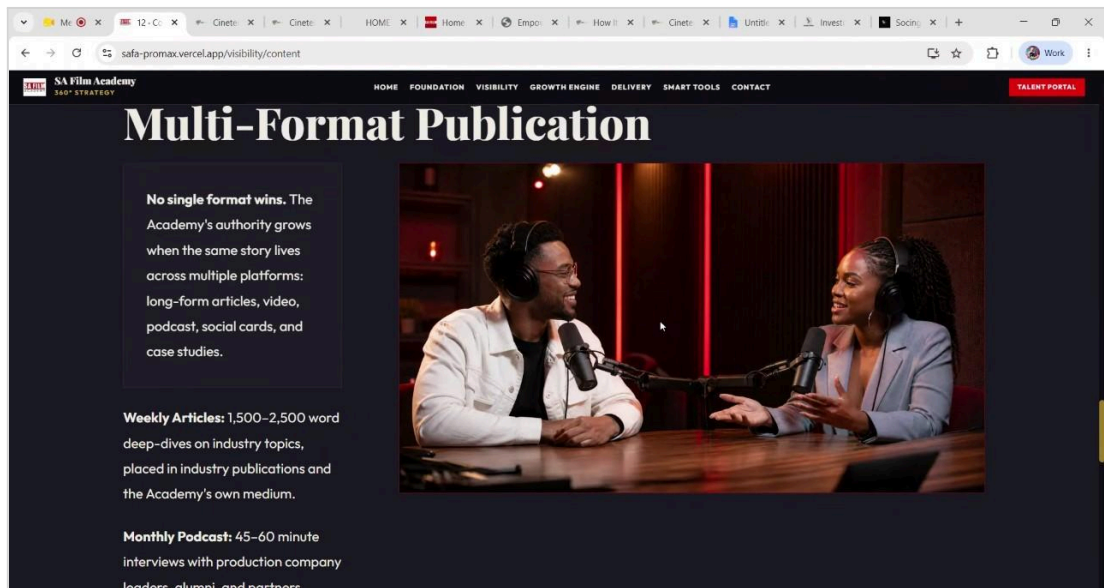

- **Governance & Approval Workflow:** Lindi Ndebele-Koka expressed concerns regarding control, leading to a clarification that the Agentic AI system allows for human oversight ([01:05:27](#)). Lindi Ndebele-Koka will retain approval rights over all content before it is shipped, ensuring they maintain control over the CEO dashboard and visibility into what the AI agents are approving or producing ([01:06:24](#)).
- **SEO & AI SEO Strategy:** Jabulile Christina Dladla introduced the dual strategy of traditional search engine optimization (SEO) and generative engine optimization (AI SEO) to ensure the academy is discoverable via Google, ChatGPT, Gemini, and Perplexity ([01:08:37](#)). By optimizing content with specific keywords—such as phrases related to internship placements—the team aims to ensure the SA Film Academy ranks highly when stakeholders perform searches ([01:09:47](#)) ([01:13:21](#)).

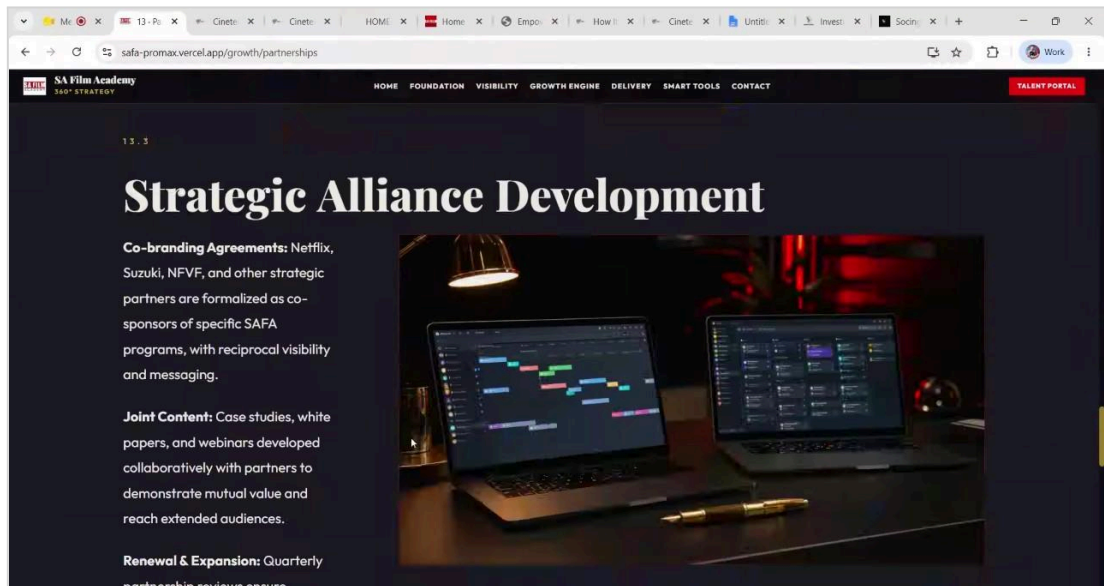

- **Executive Visibility & Institutional Voice:** Jabulile Christina Dladla proposed leveraging the CEO's voice as a primary marketing asset, incorporating photographs from events like Empower Youth and Fame Week ([01:14:30](#)). Lindi Ndebele-Koka suggested ensuring the branding also reflects the broader team, not just the CEO, to create a cohesive institutional voice ([01:15:30](#)).

- **Editorial Engine & Podcast Strategy:** The team discussed an editorial strategy focusing on AI-generated blog posts and in-house podcasts to treat the academy as an authoritative industry source ([01:16:31](#)). Podcasts are intended to be 45 to 60 minutes long, and the team confirmed access to studio facilities for production ([01:17:44](#)).

- **Partnerships & Competitive Positioning:** Jabulile Christina Dladla and Lindi Ndebele-Koka discussed incorporating strategic partnerships, such as Netflix and Suzuki, into the growth engine. Lindi Ndebele-Koka committed to sending a list of current strategic partners to be integrated into the academy's competitive positioning, which will highlight six dimensions of advantage, including B-BBEE compliance and NPC integrity ([01:19:55](#)).

- **Delivery & AI Curriculum:** Jabulile Christina Dladla emphasized the need for an AI curriculum as a differentiator for the academy, designed to teach trainees and production houses how to integrate generative AI tools into their workflows ([01:21:49](#)). This curriculum will include masterclasses on tools like VO, Cling, and Hilu, positioning the academy as a leader in post-production training ([01:24:34](#)).

- **Smart Tools Hub:** Jabulile Christina Dladla presented "Smart Tools" for the website, which serve as a front-end resource for clients to calculate their mandatory Skills Development Levy and potential recovery of up to 7% of contributions ([01:27:21](#)). Additionally, an Eco Steward ROI calculator will be available to help production houses estimate statistics regarding carbon emissions saved ([01:28:37](#)).
- **Operational Costs & Subscription Fees:** Jabulile Christina Dladla clarified the ongoing costs, stating that the monthly subscription for the Agentic AI system is 4,500, with an additional 2,500 required for secure hosting services like Cloudflare and Vercel, totaling approximately 7,000 per month ([01:31:07](#)) ([01:33:40](#)). These subscriptions support the automated workflow, which Jabulile Christina Dladla described as equivalent to employing a large digital staff ([01:31:07](#)) ([01:40:33](#)).
- **Project Fee & Financial Summary:** Regarding the work completed to date, Jabulile Christina Dladla noted an 8,500 fee, which is a one-time charge for building the strategy and prototyping, distinct from the monthly operational subscriptions ([01:36:09](#)). Lindi Ndebele-Koka acknowledged the costs and agreed to conclude the discussion in the next meeting ([01:41:45](#)).

SAST - Transcript

00:01:07

Lindi Ndebele-Koka: Afternoon.

Jabulile Christina Dladla: Good morning, sis Lindy. Oh, sorry. Sorry. Good afternoon.

Lindi Ndebele-Koka: It's already

Jabulile Christina Dladla: Yeah. So, sorry for that.

Lindi Ndebele-Koka: true.

Jabulile Christina Dladla: Don't Don't be confused. I'm using my colleagues um Google subscription because mine expired. Sorry for that. Awesome.

Lindi Ndebele-Koka: Yeah, you did say

Jabulile Christina Dladla: Uh, let me open the website

Lindi Ndebele-Koka: If I put it on the buffing

Jabulile Christina Dladla: now. Can you see my

Lindi Ndebele-Koka: Yes. Yes,

Jabulile Christina Dladla: screen?

Lindi Ndebele-Koka: I can.

Jabulile Christina Dladla: Yeah. Fire on.

Lindi Ndebele-Koka: Okay, you fire on here. This looks very impressive.

Jabulile Christina Dladla: Oh, thank you. Thank you so much. So here's the concept.

Lindi Ndebele-Koka: Yep.

Jabulile Christina Dladla: You shared with me um your presentation of a PDF um that is now with all due

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: respect it is now old school of doing presentations especially if your presentation is talking about portals is talking about digital stuff.

00:04:11

Jabulile Christina Dladla: uh every presentation has to present that which it wants to market in a prototype way. If we talk of digital, the presentation has to be digital. So basically out of your presentation I came up with four or should I say five key areas that is the foundation, the visibility, the growth engine,

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: the delivery and the smart tools. So as you start off your presentation obviously when you are saying we have a board meeting on the 20th of

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: June agenda has to be shared way in advance. presentations in as much as they are officially happening on the 20th of June. But it's always good practice to send an agenda two weeks before a major boardroom meeting. That's the norm.

Lindi Ndebele-Koka: Yeah, do

Jabulile Christina Dladla: That's our excellent.

Lindi Ndebele-Koka: that.

Jabulile Christina Dladla: So now we need to send them an agenda item that speaks to them way before you speak to them. That is the reason why we came up with the SA Fume Academy 360 marketing strategy.

00:05:24

Jabulile Christina Dladla: Y360 it covers all the key angles in line with the 2026 best practices of marketing. That is the reason why we are not bombarding the 20th of June with a PDF document or a PowerPoint uh presentation that is old school. We do away with that. We give them the actual website which we call a prototype so that they able to go through in it in advance and the website itself is able to speak to them. So we have our homepage SFU Made Italian pipeline of the South African screen explore the strategy access I know the name is not going to be sinence this is a a name in progress we still put give it a proper name so basically uh there are broken links we'll fix all the broken links when you see this is basically images that need to be added there so this is just giving a quick intro Or just like on your slide as well,

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: we go down the information that just packaged

Lindi Ndebele-Koka: Okay. So, so um just go back

00:06:30

Jabulile Christina Dladla: properly.

Lindi Ndebele-Koka: there.

Jabulile Christina Dladla: Mhm.

Lindi Ndebele-Koka: Uh go up slide slide before this.

Jabulile Christina Dladla: Have a slide.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: All

Lindi Ndebele-Koka: Okay. Kittens explained.

Jabulile Christina Dladla: right.

Lindi Ndebele-Koka: Okay. All

Jabulile Christina Dladla: All right. Perfect. And then here so that we just give a quick intro of who you

Lindi Ndebele-Koka: right.

Jabulile Christina Dladla: who we are. But the most important is this part. Who are you here for? This speaks to three key people.

Lindi Ndebele-Koka: Yeah, we must Yeah, we must start with

Jabulile Christina Dladla: Who are our Oh yes.

Lindi Ndebele-Koka: trainees.

Jabulile Christina Dladla: Yes. But I just put trainees here. I can just do rearrange aspiring trainee production companies

Lindi Ndebele-Koka: No, no, no. It should be maybe trainee

Jabulile Christina Dladla: and

Lindi Ndebele-Koka: stroke aspiring film practitioners because from training that's what you know

Jabulile Christina Dladla: I get it. I get it.

Lindi Ndebele-Koka: they they

00:07:47

Jabulile Christina Dladla: That is crystal clear.

Lindi Ndebele-Koka: become

Jabulile Christina Dladla: I will amend it to that. Well noted. And then we are targeting production companies uh

Lindi Ndebele-Koka: Yeah. Why are we Why are we only having

Jabulile Christina Dladla: to

Lindi Ndebele-Koka: men?

Jabulile Christina Dladla: um we have females. If you if you allow me to go through the entire presentation, you'll see that actually the females are appearing

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: 70 more like

Lindi Ndebele-Koka: Yeah. But here it's only males, you know,

Jabulile Christina Dladla: 60%.

Lindi Ndebele-Koka: you've got funders, two males shaking hands. You have a boy there. You have three males there. Yeah. Just just to have a

Jabulile Christina Dladla: It's okay sis.

Lindi Ndebele-Koka: mix.

Jabulile Christina Dladla: I will take not I will adjust that accordingly so that we balance it up properly um phrasing wise.

Lindi Ndebele-Koka: I like this this slide.

Jabulile Christina Dladla: All right.

Lindi Ndebele-Koka: Who are who are you here?

Jabulile Christina Dladla: Excellent.

Lindi Ndebele-Koka: Who are we?

00:08:50

Jabulile Christina Dladla: Excellent.

Lindi Ndebele-Koka: Who are we here for? It must say who are we here

Jabulile Christina Dladla: Yes.

Lindi Ndebele-Koka: for?

Jabulile Christina Dladla: Who are we here for? Perfect. or when I said when I said who are you here for I was speaking to the person who

Lindi Ndebele-Koka: Assets.

Jabulile Christina Dladla: is going through the website I wasn't speaking about SA fum academy I was speaking the one who's going through so the one who's going through right now it can be a production company that was the angle that I took but I I get your protect I get your

Lindi Ndebele-Koka: Oh yeah. Yeah.

Jabulile Christina Dladla: correction us talking to all of

Lindi Ndebele-Koka: It should be us talking to to all of them.

Jabulile Christina Dladla: them well noted I will And then here where we say

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: productions we have crewed they will be right now they're sliding as titles but I'm going to get those posters as they are they will be scroll right now they're scrolling from right to left as text but they

00:09:50

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: will be proper posters as per the other presentation. I just need to get the high res. I did try to extract from your PDF but they were pixelating. They were not good. Uh so what I just had to say is let me get the actual posters for Devil's Peak Blood and Water because I did highlight to you already that these are powerful brands that need to be showcased well and then a

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: unified architecture for talent growth. Uh take I've taken note of the male dominance.

Lindi Ndebele-Koka: Thank you.

Jabulile Christina Dladla: I'll fix that also on this image. Uh the SFUM Academy is more than a training program. It is a comprehensive ecosystem of five distinct

entities each serving a critical role in the South African film and digital media talent pipeline. These are the five which we will get to explain as we progress. And basically those five we you we did highlight on them but we're going to be breaking them some more.

00:10:54

Jabulile Christina Dladla: So the homepage is just giving a quick preview of what is in the pack but we'll be going through it in detail. So the 360 strategy is basically made up of four pillars of transformation. I would like the image I was still working on. I'm still working on the images will make them female balanced and yeah so foundation this

Lindi Ndebele-Koka: And I mean we can also I mean when when we when when we are actually doing this we can also

Jabulile Christina Dladla: is

Lindi Ndebele-Koka: provide you with with images will guide you with

Jabulile Christina Dladla: better the better uh yeah that is actually the best

Lindi Ndebele-Koka: images. Yeah.

Jabulile Christina Dladla: approach it's actually the best approach so we have the foundation the structural core this foundation is made up of the organization, the ecosystem and our infrastructure, the visibility, the market presence, uh SEO by SEO is search engine optimization, content and leadership. Then the growth strategy, the engine agendic AI, B and partnerships. I will be explaining this as we go.

00:12:11

Jabulile Christina Dladla: This is just summarizing delivery the results curriculum community and KPI. So basically this is just giving an intro of what is in the entire presentation. Our greatest area of marketing is will be you still need to give me the proper name.

Lindi Ndebele-Koka: Let's call them maybe for now.

Jabulile Christina Dladla: We are called them we're calling them

Lindi Ndebele-Koka: I mean, we we're going to obviously I'm going to share this with my team at some point and we can come up. But maybe let's call them S a one word SA

Jabulile Christina Dladla: Mhm.

Lindi Ndebele-Koka: intense. S AF

Jabulile Christina Dladla: S a Okay,

Lindi Ndebele-Koka: intense

Jabulile Christina Dladla: let me allow me to open a a word

Lindi Ndebele-Koka: some something short for SA

Jabulile Christina Dladla: document.

Lindi Ndebele-Koka: intense.

Jabulile Christina Dladla: Okay. So, let me just quickly write that down. Uh, SA Uh-huh.

Lindi Ndebele-Koka: Uh, essay for intense.

Jabulile Christina Dladla: S and spell it for me. S A S

Lindi Ndebele-Koka: S A S A as in South Africa.

00:13:31

Jabulile Christina Dladla: A.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Yeah. S A S F.

Lindi Ndebele-Koka: S AF.

Jabulile Christina Dladla: Mhm.

Lindi Ndebele-Koka: I

Jabulile Christina Dladla: I

Lindi Ndebele-Koka: Yeah. And maybe just as a film intense.

Jabulile Christina Dladla: s a film

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: intense working

Lindi Ndebele-Koka: Just it's a working it's a working working turtle.

Jabulile Christina Dladla: title.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Okay. SM fume intense. So we are renaming sinence to SA film intense. Okay. So connect with over 500 MIC SA trained film and digital media professionals. and matching engine show us the right talent for every production. And then we have the

Lindi Ndebele-Koka: Oh, so sorry. Go back.

Jabulile Christina Dladla: food.

Lindi Ndebele-Koka: So here when you click enter the portal, then it will take you to the portal that

Jabulile Christina Dladla: Yes, if you click there it I don't know whether my screen is showing.

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: Okay, let me share.

00:14:42

Jabulile Christina Dladla: It's taking us to the sin. Uh but let me let me say share browser. Okay, sorry. Just hold on. Let me stop this presenting and let me share the window so that way you're able to see. Yeah. Um s*** we go. Yeah. So when I click, let me go here. Yeah, at least I able to see my entire screen. So when one clicks on enter the portal is taking them to SA film intense. Um yeah,

Lindi Ndebele-Koka: Okay. All

Jabulile Christina Dladla: it's taking us here.

Lindi Ndebele-Koka: right.

Jabulile Christina Dladla: It's it's one thing. It's another presentation. So I hope these people are going to have enough time. Yeah, we went through this already. So,

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: it's basically taking us here and then you you'll be making a lot of presentations on behalf of SA Fume Academy.

00:16:21

Jabulile Christina Dladla: So, we said here we have re-imagined the manner in which our work is presented. Our latest showcase is now hosted at every time you go out, you just don't do a PowerPoint. You present it in the same manner you presented it here. It becomes our new standard because we are calling ourselves film.

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: That is why you see every slide as a cinematic. There's a movement. Yeah.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Because we are film. We are not just corporate. We are film.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Yeah.

Lindi Ndebele-Koka: So we'll have those links of of work

Jabulile Christina Dladla: So come

Lindi Ndebele-Koka: done.

Jabulile Christina Dladla: again.

Lindi Ndebele-Koka: We will have um the the link the links of some of the work that has been

Jabulile Christina Dladla: Yes, we can actually add uh like here the links we have also

Lindi Ndebele-Koka: done.

Jabulile Christina Dladla: the the website itself of the essay fume academy which is still linked here and we that is if you need to explain anything here we haven't done anything here uh but there are blog posts that we have written uh we need al yeah green set we have added here as a link um sen are

00:17:42

Lindi Ndebele-Koka: Nice.

Jabulile Christina Dladla: there and the social media platforms.

Lindi Ndebele-Koka: Very nice.

Jabulile Christina Dladla: Yeah, they all can be clicked and accessed from there. So basically this is our landing page. This is the first thing they see when they log in. So now let us go to the also talent portal here. when you click it's just taking people to the same uh essay film intense platform. Yeah.

Lindi Ndebele-Koka: Mhm.

Jabulile Christina Dladla: And then here now we're going through our our one two three four five key areas.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: The foundation has a landing page. Now you see the females taking the lead. The foundation has a landing page. Um and the foundation is made up of four key areas that is the organization. There's a there's a Hoover effect that comes on it when you put your mouse that is radish. We have got the brand ecosystem. We have got the digital infrastructure which is sin and the presentation in uh sen film intense.

00:19:03

Jabulile Christina Dladla: the brand architecture from five strangers to one family.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Remember what we said during our last week's was it this week meeting on a Monday it's like uh the green uh revolution in the film sector the Suzuki all these other stuff they're like strangers now we want to properly unifying

Lindi Ndebele-Koka: Yeah,

Jabulile Christina Dladla: them so that we have one

Lindi Ndebele-Koka: not really strangers. Um, from I think strangers is is a bit strong. What I want to present is is a coherence between between the three

Jabulile Christina Dladla: Mhm. We can what?

Lindi Ndebele-Koka: subsidiaries. Yeah. They they are

Jabulile Christina Dladla: Excellent.

Lindi Ndebele-Koka: subsidiaries.

Jabulile Christina Dladla: So, ah perfect. So, the f the subsidiaries within a family will just phrase it along those lines.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Excellency.

Lindi Ndebele-Koka: Not not strangers.

Jabulile Christina Dladla: Okay, we'll remove that. Well, uh so basically before we go through all this, uh first you are going to I on this page the foundation the remember the home it is a landing page of

00:20:23

Lindi Ndebele-Koka: for the presentation.

Jabulile Christina Dladla: the entire picture. Yes.

Lindi Ndebele-Koka: It's the landing page for the

Jabulile Christina Dladla: And then yes exactly

Lindi Ndebele-Koka: presentation.

Jabulile Christina Dladla: then foundation it's like another website that is made up of four key areas but there is a fifth one which is when you click on it you learn this page first um and it's summarizing what is there. So here uh pillar one the foundation structure ecosystem and infrastructure. Then scroll down explore the foundation sections. Select a section below to dive into the structural strategy of the organization, our brand ecosystem, our digital infrastructure and our brand structure. uh then after this it's talking taking you to visibility but we'll go there. So now we are going through these four key areas that are

Lindi Ndebele-Koka: So this is under this is under home or foundation or

Jabulile Christina Dladla: under foundation.

Lindi Ndebele-Koka: foundation.

Jabulile Christina Dladla: It's now under foundation.

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: So when you click here even the URL here it writes for you foundation when you when you on

00:21:51

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: home it doesn't write anything it just leaves it like this because it's a homepage it's a landing page. So on foundation you can access the four key

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: areas either from here you can access from here or through the landing page itself of foundation. So let's start with the organization MIC Sitter accredited 20 years of placement. We click on it. Um so the organiz who we are what we actually do and the p perception we have already begun to shift the work skills facilitator.

Lindi Ndebele-Koka: Yeah,

Jabulile Christina Dladla: Um,

Lindi Ndebele-Koka: it show who we are, what we do.

Jabulile Christina Dladla: you will.

Lindi Ndebele-Koka: Sorry. Just who we are,

Jabulile Christina Dladla: Yes.

Lindi Ndebele-Koka: what what we do.

Jabulile Christina Dladla: Or you mean here.

Lindi Ndebele-Koka: Yeah. No, no. Just go back. Who we are, what we do.

Jabulile Christina Dladla: Okay. Here we rename it that way.

Lindi Ndebele-Koka: No, no, no. Uh, just below that sentence below, it must say who we are.

00:23:19

Jabulile Christina Dladla: Oh

Lindi Ndebele-Koka: Yeah, just who we are,

Jabulile Christina Dladla: here.

Lindi Ndebele-Koka: comma, what we do. Remove actually.

Jabulile Christina Dladla: Okay. Who we are, what we do,

Lindi Ndebele-Koka: What we do?

Jabulile Christina Dladla: we remove actually. All right.

Lindi Ndebele-Koka: And then and then the last sentence you can just say shifting the

Jabulile Christina Dladla: And

Lindi Ndebele-Koka: perception.

Jabulile Christina Dladla: okay here we say shifting the perception. I like that. I like that. Excellent.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: So our home page this we're going when you I have access to your photo library. We deliberately gave our photos a dark look. It's grading so that our text stands out. If you make this too light, this becomes not visible that much. So, it's a cinematic dark look by design. Even when you supply us with your photos, you do the same grading on those photos so that our text may stand out. So,

00:24:22

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: the organization

Lindi Ndebele-Koka: Yeah. I was about to ask that. Maybe maybe it's a bit too dark for I hear you a little.

Jabulile Christina Dladla: Okay. But I will brighten it a little. We'll brighten it.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Yeah, I get your point. Then the work skills facilitator. Any changes you'd want here.

Lindi Ndebele-Koka: Okay, this is fine. I mean we will we will go through it in detail when we when we take through the team some points.

Jabulile Christina Dladla: Okay. Excellent.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Excellent. This is basically text. We add more photos here. Um the two tier pathway. Yeah, this is content writing. We add more pictures. The administration infrastructure as you explained as you go through with your team.

Lindi Ndebele-Koka: So this this would be part of the

Jabulile Christina Dladla: Yes. Yeah. The shifting shifting the perception.

00:25:24

Lindi Ndebele-Koka: Dream.

Jabulile Christina Dladla: What we're trying to do sis Lindy is try to summarize not add more text. It's already we'll be adding more pictures just to break down the text well so that it does not become a book. So we are still going to add more pictures. Yeah.

Lindi Ndebele-Koka: Okay. Can I just use them?

Jabulile Christina Dladla: I

Lindi Ndebele-Koka: Let's go back just this perception thing.

Jabulile Christina Dladla: did.

Lindi Ndebele-Koka: Uh okay. So, so this is just for me when I present,

Jabulile Christina Dladla: Yes. But but you need to finetune.

Lindi Ndebele-Koka: right?

Jabulile Christina Dladla: Remember we recorded you last time. So I made the presentation with the recording we had but you still now need to put in your voice.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Uh yeah you need to put your voice the the wedding is more like

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: placeholder. I wouldn't I know between us we spoke of it being a cap led by Captown based white production companies a structural barrier to credibility.

00:26:42

Jabulile Christina Dladla: If it's too strong we can remove it. uh but it's up to you now to what I've done I've guided I've put the pillars I've put the text which is in skeleton for you to

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: uh finetune it some more

Lindi Ndebele-Koka: Am I able to fine-tune from from what you've sent me? Is it editable?

Jabulile Christina Dladla: yes what I'll make that's the next thing that I'm supposed to be building I'm going to build what we call a CMS CMS. A CMS is a content management system. It's a software that I'm building specifically for SAM Academy. So that when you are editing this, you're editing it on the actual website without

seeing the code. Um on my side there's the coding. It's like making you fix a car without dealing with the diesel stuff, dirty engineering stuff. So that's the next build that I'm doing for you.

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: And on Monday you are going to have that so that you actually type here and then you click live it goes live onto the website.

00:27:53

Lindi Ndebele-Koka: Got you. Okay, let's

Jabulile Christina Dladla: Yeah. Yeah.

Lindi Ndebele-Koka: continue.

Jabulile Christina Dladla: So that's so the the text part I'm not worried because you'll be able to fill in more and feel free to suggest appropriate images as you as you said. So we have just gone through the organization.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: We were here. Now we are moving from here to the brand ecosystem. Five entities, one architecture. We click on it. The five entities, one architect a branded house unified under safer. Um scroll through the branded house. So here now we have our site architecture plan. We have in the middle the SA fume academy which is the master brand MIC SA NPC.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: We have the academy of creative excellence ACE alumini as you said here. Uh we have the film growing academy Suzuki 124 licenses so far. We have the SA which we are rebranding to from sin to SA film intense digital talent portal 500 plus profiles AI match.

00:29:17

Jabulile Christina Dladla: Then we have the green set. So this just summarizes our five. This is our baby. This is your invention that you are adding. Uh these are already in existence but we need to polish them up some more.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: So this is a new baby. Initially there were 1 2 3 4. So why this design is we have done it that our new portal the Saf

Lindi Ndebele-Koka: What?

Jabulile Christina Dladla: Academy as people branch to academy of creative excellence. This will be like a sub website. It's not really going to be a website per se. It will be a sub because it's coming from here. It's coming from here. The fate also has to come from here.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: It can have its green look and all that but it should come from the mother. Same applies with the sin. Same applies with film grow. It's not a stand alone thing.

00:30:13

Jabulile Christina Dladla: It's coming from here. So we what we are saying by this when we are done polishing up all these areas our main engine the SL fuel academy we need to revamp it uh properly give it a new look. We're not destroying it. We're just giving it a revamp. That website requires actually a reverb so that

Lindi Ndebele-Koka: Yeah. No, it does. Definitely.

Jabulile Christina Dladla: Yeah.

Lindi Ndebele-Koka: That's why I'm wanting this marketing

Jabulile Christina Dladla: Excellent.

Lindi Ndebele-Koka: strategy.

Jabulile Christina Dladla: So that it links up to all these other subdomains properly. So this is just our architecture map. uh you can pause here and explain uh as what I what I'll be doing is just animating you see on the other slide there's a subtle animation happening showcasing the link between an architecture plan so yeah and then this comes to your text feel free to

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: write uh the essay fumade is a branded house surfaces at the aex It's explaining what we're talking about there.

00:31:27

Jabulile Christina Dladla: Uh yeah, the text I don't we don't need to read it.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: You go through it with your team. Now the five pillars we just talked of here here are there. Now don't worry about the pictures. We can always change here.

Lindi Ndebele-Koka: Heat.

Jabulile Christina Dladla: ACCE Academy of Creative Excellence Alumni and Hod Pathway for High Level Creative Leadership. We can also rephrase whatever we want. film grow. Don't worry, there should be a Suzuki car. I deliberately put a guy there. Um, there will be a Suzuki. Yeah, actual image. Yeah, green set will put um actual image of

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: a green set that you worked on. And then Senance there um

Lindi Ndebele-Koka: Heat.

Jabulile Christina Dladla: digital gap bridging the divide between traditional film training and modern uh digital infrastructure. This is actually the SAM Academy. That's why we are having five.

00:32:29

Jabulile Christina Dladla: Remember we spoke of five but Saf Academy is the

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: fifth one but it's the mother. So that is the one that we are calling the digital gap.

Lindi Ndebele-Koka: So you can start with with that. You can start with the mother and then

Jabulile Christina Dladla: with a mother. Okay, perfect.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: So the mother will start here and then the other four will be explained

Lindi Ndebele-Koka: Yeah. and and then I mean when you can start with that and then you can have

Jabulile Christina Dladla: well

Lindi Ndebele-Koka: um say film academy bridging the digital gap something like that

Jabulile Christina Dladla: bridging the Yeah, perfect.

Lindi Ndebele-Koka: bridging yeah okay you've got it bridging the divide

Jabulile Christina Dladla: Excellent. Excellent. So this is just echoist.

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: If you see on the URL sis Lindy here, there is a URL that tells you where are you? So that in the event of doing a presentation, you ask yourself where am I now?

00:33:32

Jabulile Christina Dladla: We are in ecosystem. Remember foundation brand ecosystem.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: It doesn't run write brand ecosystem in full. It just writes ecosystem. So that's the page that we are on now. So we have done the organization. We have done brand ecosystem. Now we are going to the digital infrastructure. Our new baby the sentence that we now which we now call the SA film intense and the presentation engine. How will the how you as CEO present? I actually have a dedicated section of you the CEO because you are part of the brand. Many say I will explain more when I get to that slide. So now we are digital infrastructure. When you click on digital infrastructure, it lands you to a page. Don't worry about the text. I'm going to clean it up some more. It says infrastructure already on your URL. So this is the landing page of the digital infrastructure.

00:34:36

Jabulile Christina Dladla: It's not the landing page page the hero section. So what has already been built and why it matters before anything else is scaled. What it's basically saying what is it that we have built already. We have built the Saf Academy green set those digital platforms are there already. social media platforms are there and why does it matter for us to cons to to have a look what what has already been built what is it that has already been built is the SAM green safe social media platforms that we need to know and properly scale before we scale them further so this strategy is not is not aspirational the infrastructure that underpins everything else is already live deployed and demonstrated able. What we are saying also is the SFU Academy is already running but we have a new baby that we are now in terms of um why do we need to rebuild this is I deliberately animated this part cuz I need to explain it in a in a in a very good way why the website of the SA Fume Academy deserves uh a reverb in developing here we call it the text tag we always see the browser which is the front end but beyond that beautiful car you drive Sis there's an engine I just don't your presentation should not just speak on the beauty of the car seats

00:36:18

Jabulile Christina Dladla: the steering wheel the the red color the green color which we call the front end it could also speak about the back end. The back end is the engine that powers our our our digital

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: infrastructure. So there's a new technology sis called the next GS. Uh the next GS is powered by vessel. If you look at sin's all even this website that you're presenting on behind the scenes, this is what is happening. We are seeing this browser but when we click scroll when you open it in in Cape Town when you open it in London it's being powered by this engine. You don't necessarily need to know the technical details of it but you as you drive your car you just need to know which fuel powers my car. Is it diesel? Is it petrol?

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: You just need to have basics of mechanics. So our new tech or digital presence is being powered by cloud flare.

00:37:28

Jabulile Christina Dladla: Our CDN shall be on cloud flare and we are using a technology called Nex GS to power our websites or our digital systems. there. It is good. There's CDN, there's DNS, there's B protection. What do we mean by B protection? Superb gaming group website was hacked two years ago. I was there working as one of their programmers and the people that hacked um Super Base demanded a million rand worth of ransom to release it. Initially they were paid but for the second time they tried to hack it they couldn't because it was now powered and protected by this engine that you are seeing here. This makes our site safe secure when people are logging in and hiring intense. You have your entire infrastructure on the digital cloud. People tend to be afraid to say why what if we get hacked but next GS14 uh it's powerful it's secure uh yes hackers can try but we are very secure so this is more of a popular grade is what we say people are going to be creating their profiles Johnc manga is going to be logging in and putting in their name that's a popular act the moment people log in and create profiles you have to prove to them that the site is secure.

00:38:56

Jabulile Christina Dladla: They're putting their phone numbers. So, one can hack just to steal the data or phone number, address, email. There are data that actually do that. So, I just am not focusing on the front end, which is the browser. I'm focusing on the engine as well. So this is the text tag that runs the browsers of the at the moment I can only speak of sin and this site of a presentation I can only speak of these two because I'm the one who has built them. So I can tell for conf with confidence that this presentation it is secure. It cannot be hacked. Um if you want us to put a password on it so that we ever access this presentation we can also do so. We can make it password protected. But for now for presentation purposes between us I left it open. But before you you send it to your board there will be

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: um uh a password.

00:40:07

Jabulile Christina Dladla: I'm going to allow me just to quickly demonstrate that cuz security and confidentiality they are very important. Uh allow me just give me two minutes to quickly do this presentation. It is not for SFUM Academy. It's for the mining sector whereby highly confidential documents are being shared. It's the same thing that we're going to be doing here. So I'm going to go here. I'm going to click on the Sina Africa and quickly go to the mining. I hope you can still see my slides,

Lindi Ndebele-Koka: Yeah,

Jabulile Christina Dladla: sis Lindy,

Lindi Ndebele-Koka: I'm I can see

Jabulile Christina Dladla: you see. Okay, I'm going to go to mining and I'm going to go to the investor hub. All the other things here accessible with no password. But if I come here, investor hub carries so much confidential stuff. uh one has to get approved. So this is what I'm going to put on your on your presentation.

00:41:08

Jabulile Christina Dladla: You we're going to approve everybody who who has access to it because it has your confidential IP cuz when you share this with anybody I know who logged in I will know who's online. I you get to see that in a moment. So access uh same dosia it will say access the SA fume academy marketing strategy. So one clicks there and one has to register. You already see that there is either you have to create an account. Since I already have an account I'm just going to type hello my email. Let me just quickly do this first. Um, add my password cuz security is equally important. Just Oh, sorry. I'm using the wrong email. Um, quickly this accessing. Voila. Now I have access to the dosier that is carrying highly confidential information and PDFs um the summary of what is stakeholders are currently deliberating on since I'm an administrator if I click on admin portal I can revoke pending up I approve people I can add you as a user you know I can put your email address I can give you a password and decide am I adding you as a team member as a viewer or as an admin Since you are presenting to the board yourself, so you will be one of your staff members will be approving board member or

00:43:08

Jabulile Christina Dladla: whatever uh roles you'll be the admin. Obviously admin gives you the right to edit this site.

Lindi Ndebele-Koka: Yeah,

Jabulile Christina Dladla: So we will know who is online, who's offline, who's accessing what etc. So I just let me go back to our presentation. So this is part of the security that we're going to build along all your board presentations that you approve access to them because the presentation carries highly intellectual IP which we want to protect as well. So that's about the stack circuit and what will come through some more and then the digital infrastructure of the SFU Academy is built on a modern high performance tech designed for global scale leveraging it's now explaining what I was just saying leveraging the next GS14 vessel edge and cloud fail we ensure sub 100 ms latency and copy are great security across all user touch points this is key copyers whenever you start on boarding people in

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: their profiles uh we have to showcase security and that's what I was what I was explaining

00:44:18

Lindi Ndebele-Koka: Oops.

Jabulile Christina Dladla: to you what is here basically is what I've just explained to you that is coming but I've left this site open deliberately so that it's we need to finish this lock it and then lock it afterwards with additional security features Um this is not a theoretical plan. The core components of this infrastructure are already live. What I'm talking about is is live. It's happening on sin. Um the back end which you cannot see this back end is already happening. The way it's animating right now, it's a live animation. It's actually happening as I'm speaking to you. Vessel is running as you can see. If you see this thing stop running, it means we have a fault. So, you're able to monitor the security. It's like having an alarm at your house or on your car. If you click the alarm thing, it turns to red. It shows that your house is now armed and the light is flashing.

00:45:29

Jabulile Christina Dladla: That is what is happening right now. So, that's what I'm talking about here. When I say uh this is not theoretical plan, it's not theory. I'm not just sharing a theory. The core components of this infrastructure are already live and operational providing foundation for the senance portal and the ACAM's digital present. I'm excluding the Safade Academy. I'm excluding green set because I didn't build those. I I'm not I don't know the engineering behind those platforms. So we build for the future on the reality of today. You can say ah why no need for tight security we can be had. Why would people want to hack an NPC? They would want to hack an NPC or an NPO to get your data. Data is gold.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Data is now gold. If you have 500 people on your website, yes, they would want to hack you to get that data of those 500 phone numbers and they do whatever that they want with that.

00:46:35

Jabulile Christina Dladla: So it's a law even for Facebook. It's a law for even Twitter, Instagram. Yeah. And then the placement pipeline. This is more like the tech part. I know you can say why do I really need to present this? Yes. EO you need to present the tech aspect of what powers your system is very key on a marketing strategy. A marketing strategy does not only speak about front end the red the seats the the the dashboard of a car as CEO you need to know what powers your car what p powers your um your your your entire uh pipeline. So the placement pipeline is the setter approval trainee profile senance proile

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: agentic match production company active placement it's it's basically will be linked on one of your screens let's say we are going to build a small a CEO you were asking me last time uh sis Lindy about what will I be able to see get reports of what is happening um in my ecosystem.

00:47:56

Jabulile Christina Dladla: So this is summarizing that on one of your setup at your house we have to create a mini it's a mini control center with a TV screen just a normal TV screen that we inject we just buy an ordinary computer um which is a budget of 5,000 a computer and a TV screen and it and we buy a virtual machine space you'll be able to know exactly approvals from Sitta. There will be an API whatever that needs to be approved from Sitta whether we applied for um the next funding cycle for the next year. There will be a dashboard specifically giving us alerts just like the way you get notified on your phone via Gmail of an email that just entered or anything related to Sitta that needs to be approved. There will be the uh training profile uh a dashboard of the training

Lindi Ndebele-Koka: Okay. I mean this we will yeah we we will discuss when we discuss with the team

Jabulile Christina Dladla: profiles.

Lindi Ndebele-Koka: because sit communication is done through their system which is

00:49:11

Jabulile Christina Dladla: Yes, that's that's what I mean. We are not building it will be their system linked to our system in a way. We we get API keys if they approve of

Lindi Ndebele-Koka: Okay. Yeah.

Jabulile Christina Dladla: course.

Lindi Ndebele-Koka: Because we have um an administrator they they call them the SDF which accredited by Sitta.

Jabulile Christina Dladla: I

Lindi Ndebele-Koka: So Sh is our SDF then she gets all the notification you

Jabulile Christina Dladla: see.

Lindi Ndebele-Koka: know every step.

Jabulile Christina Dladla: Ah, I see.

Lindi Ndebele-Koka: Yeah. So

Jabulile Christina Dladla: Not a problem. Awesome. And then infrastructure at scale.

Lindi Ndebele-Koka: yeah,

Jabulile Christina Dladla: Um all these websites they live somewhere. They don't live in a cloud like just any people when they hear cloud they just hear cloud like they're just in the air. No, there there's there's a platform data centers where all the websites the FBS they're living you know there and

Lindi Ndebele-Koka: Please.

Jabulile Christina Dladla: um we have storage on our vessel.

00:50:18

Jabulile Christina Dladla: So that this part is explaining about that uh global edge network content is served from 275 plus data centers across six continents. What cloud flare does it duplicates it mirrors the content.

Lindi Ndebele-Koka: Oh.

Jabulile Christina Dladla: If this other data center is down, our site will never be down. 27 uh 24/7 monitoring in the platform is continuously monitored for performance security. That's what I explained. Opia compliance or trainee data production records and

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: sensitive placements are encrypted end to end and comply with South African data protection standards. This is very key. Many amateur web designers that do they ignore this as we have it declared and is what I I just summarize to you now. Um the sin portal this is now marketing the sin is a flagship digital product of the essay film academy serves as a comprehensive talent portal where yeah you see all that it's just a quick summary of what the SA film intense is all about.

Lindi Ndebele-Koka: Yeah.

00:51:32

Jabulile Christina Dladla: So remember we're still on the infrastructure. So now we are going on brand architecture. We are we agree that we're not going to call it five strangers.

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: Sorry if I use five strangers. We're going to call it subsidiaries. So note of that. So now we are going there. We click there.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: We are welcomed with what we call a hero section. Each page has got a hero section. is the first thing people see brand architecture and identity five entities currently uh read as five sorry I'm going to move you it's you know what happens is Lindi in our Monday meeting you kept on saying the word strangers so I kind of worked with that yeah you said you said green

Lindi Ndebele-Koka: really. Okay.

Jabulile Christina Dladla: set it's kind of kind of like a stranger yeah so I kind of

Lindi Ndebele-Koka: Oh, okay. I remember.

Jabulile Christina Dladla: ro on that but we are going to call Five subsidiaries.

00:52:30

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: We're doing our way with the word strangers. Um yeah,

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: we want them to read as one normal family. So the branded house the brain fragmentation problem is the central diagnostics. Five entities suffer acceet cinitans exist independently but they don't exist in we're going to come out with proper phrasing but yeah so that we make them read as one coherent family.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Here it says each leaves on its own URL with its own visual approach. Uh we need to unify that's the part I was saying unifying the mother house saf academy all these other entities should imitate em uh be moving from or when we should be accessible via the safety. Uh the proposed architect is a branded house. SAF market is the master brand. As we said, each subsidiary carries a deliberate vision verbal relationship to it. We explained it well. Uh the branded approach. So the brand voice principles authoritative.

00:53:46

Jabulile Christina Dladla: The academy speaks as the body that has placed trainees as the on the woman king without ever sounding like it is reading from a brocher. Uh we need to what I meant I did let me explain this part properly. I did say it to you in our Monday meeting when I said we have got the woman king a powerful brand but um now the academy needs to speak as the body that has placed trainees. We really need to leverage all the power of this brand

Lindi Ndebele-Koka: Yeah. And I mean um it's not only woman king we can say that has placed trainees on

Jabulile Christina Dladla: lately.

Lindi Ndebele-Koka: on over so many so many productions for example woman king I mean all those ones that you had

Jabulile Christina Dladla: Yes. Perfect. Perfect. add that uh proudly local local idom and insider fluent we

Lindi Ndebele-Koka: There.

Jabulile Christina Dladla: can always clean it up some more datadriven I want to speak here um statistics and the right to be quoted the academy never lapses into the airless language of an annual report when the lift story is far stronger so by datadriven we'll be carrying statistics case from all these principles that have been broken down on under

00:55:09

Lindi Ndebele-Koka: Oops.

Jabulile Christina Dladla: our marketing strategy will be data driven we will not be emotion driven that's what I meant to say to say ah we are there will be a Google analytics which shall be attached also giving how many uh apart from uh 500 plus placements and all the other data it will also be speaking of traffic proper engagement there will be ways of measuring. That's what I mean by that. Uh visual system implementation, type system, uh player display. I'm talking about the brand because you cannot talk of a marketing strategy

Lindi Ndebele-Koka: It's okay.

Jabulile Christina Dladla: without talking of the phones, the color palette, the photographic aesthetic of it. So type city right now played displays the font sur italic for headlines and emphasis outfit um because I never asked for your brand manual. I just had to make this up but you can still send me your brand manual as it is and I'm going to add the brand manual. Uh the pairing signals authority and modernity simultaneously color palette gold.

00:56:32

Jabulile Christina Dladla: I know it's not gold, it's reddish. Uh here I'm talking of a color palette that is here, but I haven't received your brand manual. So here we are going to edit it some more and embed what is on your brand manual and then deep red secondary with dark background that reads as dark. So you will hand me over your brand manual and then we will fix this photographic aesthetic. Every image uses consistent cinematic lighting. I say I told you this already. Warm golden key light with deep red side light. No stock photography. Every image is custom AI generated or professionally shot for brand specification. All these images you see sis Lindy they are not from Getty images. They're not from all those talk. We have created we have generated them. We don't have any licensing aspect. We generated them. That's why you see them having a a consistent reddish look on them.

00:57:40

Jabulile Christina Dladla: Uh so that's about the brand aspect of it, but this will feed it more with the brand manual that we get uh from you. So this summarizes the foundation. Our foundation is the organization, brand ecosystem, digital infrastructure and brand architecture. So if you scroll down while you're doing your presentation, you see at the bottom is next is marketing calendar. Marketing calendar is what is on the visibility. So when it says next, it's not saying next is visibility. It's already touching this. So under visibility, we click on visibility. We have remember the photos have got this reddish it's like kind of our reddish look from the Saf Academy uh but it can still be fine-tuned some more. So now we're on visibility landing page. So the visibility pillar how the world sees SAM Academy a strategic approach to SEO search engine optimization content marketing and institutional leadership. How are we how we are seeing is not just the saf academy it's the the the

the license it's the green set it's the sentence it's the access so we have got to explore the visibility

00:59:03

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: sections uh our 12 month calendar a first road map for foundation visibility authority and scale seo and also I'm going to explain that uh institutional voice leveraging executive visibility to drive institutional authority. This is more the CEO part content marketing. So the landing page is just summarizing our key four area areas under visibility. Let's dig into them. 12 month calendar foundation visibility authority and scale. Let's click there. The 12 month calendar, marketing calendar, June I the dates, we can always change them. June 2026 to May 2027. Four quarters, four phases, every milestone visible. So implementation timeline because it's not just enough to present a marketing strategy, we need to showcase the implementation of it. So we have got the sin better when we we need to say sorry we now have decided to call it SA fum academy intense we have got the uh 50 profiles face placements we need to speak about that foundation which will run from June June July and August we need to release the better version of the sentence remember I say to you already don't worry much about the bill of it we let's let's do this provided we can pay for the subscription.

01:00:42

Jabulile Christina Dladla: So we are already saying when you are presenting to uh your board when we speak of the sinans we need to speak of the timeline of the sentence the sinans remember we still have this portal we are saying this is a prototype you see you have already built

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: a prototype but that prototype now now needs to be released as beta so when we say better sis Lindy by beta we mean before a software is released it goes through uh three key phases. It goes through prototype. This is a prototype. A prototype has got mockup images that we're going to use now and put actual images. We can get 50 profiles before you go to present. Our sen would have

at least a minimum of 50 profiles on them so that at least you show them what we call a working prototype. It will not yet be a beta but we are saying as from June to August we need to release a better version. When we release a better version it's not really officially launched but we are testing it and doing corrections on it.

01:01:55

Jabulile Christina Dladla: And then visibility here we are September to October 2026 content pipeline social uh uh uh cordance and podcast launch. Uh I deliberately put a podcast there because we don't have any podcast of where we talk of film. Yes, you can be invited and invited guest but we can also have our our touching base inhouse whereby we are talking of everything that is happening within the SA film academy not just the film academy itself but the film industry as a whole. Then the authority partnerships case studies industry recognition scale 500 plus profiles tier one uh clients revenue growth I know you're an NPC when we say revenue growth I mean money that has come through funding and yeah so here now I now explain what is here is now being explained here uh foundation and launch authority and funding. Um you still can go through it and write it properly some more. This is just explaining what I was explaining here. And execution rhythm uh weekly guardians every Monday the ex execution team gathers for five decisions.

01:03:23

Jabulile Christina Dladla: What's shipped? What's blocked? What's next? Who owns it? When does it close? um monthly visibility. This this is statistics that is coming the weekly card. It's coming to you as CEO via aic AI which I'll explain in detail as we progress. You are able to see what shipped by what shipped new profiles shipped to go live on cit. What's blocked? Do we have any technical glitches? The system will be reporting to you what's blocked. Are we having any glitches? What's next? What is next for you to approve? Remember blog articles will go for

Lindi Ndebele-Koka: So this is a back hand.

Jabulile Christina Dladla: your back end.

Lindi Ndebele-Koka: I mean most of this is back hand. Okay.

Jabulile Christina Dladla: Yes, it's back end. You are right. Uh who owns it? By who owns it?

01:04:16

Jabulile Christina Dladla: We have you have got five agents working for you. Who's owning the report of the CEO? Cuz the CEO has to give a monthly um or weekly report on LinkedIn on what's happening. So when you say when we say who owns it, which which agent which agentic AI owns what cuz you're going to have agents. Uh I'll explain in detail on that particular segment. When does it close? Every Monday there's a CEO report that goes on LinkedIn Safade because all these are brands. Greenstone, green set I mean uh uh go the the the Suzuki all these stuff need weekly reports. So there will be a particular agent assigned for the CEO assigned for SAU Madame assigned for all these digital platforms. The board sees complete progress against the 12 month map. No surprises. Yes. No delays hidden. The calendar is the contract between strategy and delivery. They it is a digital calendar that we are going to have as a dashboard.

01:05:27

Jabulile Christina Dladla: You asking will I have will I be knowing what's happening? Yes. As CEO you know the system itself will be telling you what has been you won't there won't be surprises. That's what I meant to say. No surprises. You won't be surprised to see an article because people say, "Why? We can't trust AI. You don't trust this agentic robots. What if they go what if they go awall and just starting posting p***

Lindi Ndebele-Koka: So, so,

Jabulile Christina Dladla: and it won't happen?

Lindi Ndebele-Koka: so aidentic AI means agents AI.

Jabulile Christina Dladla: Yes,

Lindi Ndebele-Koka: Oh, okay.

Jabulile Christina Dladla: you actually have stuff. These are people, sis lady, you you enjoy this. You have stuff working for you that is physical. You have a you have got

this and that and you have got your digital staff as well. But we are saying I'm not trying to scare you by saying this there won't be no surprises, no delays or hidden stuff.

01:06:24

Jabulile Christina Dladla: You still have control because before anything is shipped you know you

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: approve all your

Lindi Ndebele-Koka: And I mean I still I still have seed to obviously be part of the SEO

Jabulile Christina Dladla: do all that.

Lindi Ndebele-Koka: stuff kind of.

Jabulile Christina Dladla: Yes, 100%.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: So what we are saying, she's there. She now knows what's when I say approvals, she'll still have approval rights as well. Uh because we don't want you to we don't want to make the CEO work as an administrator. At the end of the day, what I'm trying to say that on your CEO dashboard, you will know that Slair has approved this. You will know what SIL has approved during the week. In other words, you get to know is CL working or not working. That's what I'm trying to say.

Lindi Ndebele-Koka: Yeah. And I will also sing to to say go

Jabulile Christina Dladla: So,

Lindi Ndebele-Koka: ahead.

Jabulile Christina Dladla: exactly.

01:07:26

Lindi Ndebele-Koka: Okay. All right.

Jabulile Christina Dladla: Exactly. Yeah. So, we are not putting giving 100% control to the agentic system. we're not doing. So, we still have control over it. There's not going to be any surprises. So, that's what I meant by that. And then the rhythm, this rhythm transforms the marketing calendar from a planning artifact into an operational instrument. Many are good with talking about this. Where would CEO sis who do this, we do that, we do this. But it's just it's just on paper you know this what I'm sharing with you will be operational you know you see an operational calendar that is showcasing those agentic you literally will be seeing a LinkedIn post going live in 5 4 3 2 1 on a Monday at 8:00 a.m. W live. So it's a it's a it's a dashboard kind of a calendar that is running Monday to Sunday and we're able to see clearly not as a PDF presentation but when it goes live you see all that.

01:08:37

Jabulile Christina Dladla: So ready to explore the content strategy. So that was the calendar. We have touched on the calendar here. Now we are on Now we are on uh SEO and AI SEO. Found by search engine and AI engine. We click there. I'm going to clean up the text some more. Found by search engines today. Found by AI engines tomorrow. Both deliberately. Traditional SEO and generative engine optimization. A I S E O are no longer alternatives. They are two halves of the same discovery surface. What do we mean by this? Cuz this is our land. This is our hero section. This is the first thing as CEO you are saying to your board as you do your presentation that when we speak of search engine optimization, let's let's first of all define SEO. SEO. I mean, right now there's a production house in Rosebank.

01:09:47

Jabulile Christina Dladla: They're looking for 20 intense. They're going to go on Google and they're going to type I need or looking for 20 intense. Sappa should quickly pop up on the top three. But nowadays, people no longer just use Google to search for intense or for search for placements or any kind of search. is not not only being done by Google. Sage has now being done by church GPT, Gemini, Perplexity, you know, um, uh, deep search. People are also now using search on AI platforms. So, what do we do when we build our content

Lindi Ndebele-Koka: What is what is seo?

Jabulile Christina Dladla: strategy?

Lindi Ndebele-Koka: What kind of

Jabulile Christina Dladla: SE Okay, thank you.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: SEO is search engine optimization. Right now, sis Lindy, you uh if I look at your profile photo, I see a youngster. Let me call you that youngster your grandchild. You you want to look for a baby daycare center. You are going to go on Google and search You're going to type near near Midrand.

01:11:12

Jabulile Christina Dladla: I'm looking for a daycare center in Midand and there's going to be five things that pop up. Those words that you entered there, they optimized to be on the website of that dayare center. That daycare center will have a blogging area whereby they will say looking for a daycare center in Midland. So the moment you search it on Google already that word is appearing on the website of that dayare center automatically that dayare center let's call it ABC daycare center is going to quickly pop up on your search and it will rank number one because it's it it on its website it placed keywords. So I know SEO sounds fanciful. They are basically words that are key in making safer rank high on Google. So that is the old school which is still functional. That's why here I said both deliberately. I use the word both deliberately. What do I mean by that? Traditionally we are still searching on Google.

01:12:27

Jabulile Christina Dladla: I need a placement. Okay. You want to go to Cape Town, you search for flights.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: You just don't anything that you do in your life. Sis Lindy, you search, you do a Google search. Anything you go on Google and search that is search engine optimization. Now we are saying on that which you search for,

Lindi Ndebele-Koka: It is.

Jabulile Christina Dladla: what are the keyword that people use when they are in the field industry looking for intents? We put those key words together. We make sure that those words,

Lindi Ndebele-Koka: Okay, I get you. I get you. Okay.

Jabulile Christina Dladla: you get me now.

Lindi Ndebele-Koka: Yeah. Right.

Jabulile Christina Dladla: Excellent. We make sure that the key words people are looking for when they are running a search, they are on the sin's website, they are on the SA Fume Academy website, they are on the green search website. all those key words.

01:13:21

Jabulile Christina Dladla: We can say um what are the key when when you build a bakery and you have a bakery website, you can't just put words there randomly. Every single word there has to be optim optimized in the sense that whoever is looking for fresh bread looking for fresh bread in midrand that phrasing has to be on our website so that we rank higher on searches. So now you know you are a familiar everybody's familiar with SEO but people are not conscious that we now have AI engines. Google is a search engine of today. That's what this title is saying. your CEO and yeah I wish it was me presenting this now I'm envying you because I love this part cuz we are

Lindi Ndebele-Koka: No, no, no.

Jabulile Christina Dladla: saying

Lindi Ndebele-Koka: I'll probably I mean I'll probably invite you to, you know, to present.

Jabulile Christina Dladla: oh I'll be honored I'll be honored so he

Lindi Ndebele-Koka: Yeah. Yeah.

Jabulile Christina Dladla: saying

Lindi Ndebele-Koka: Okay. So, let's let's move quickly now.

01:14:30

Jabulile Christina Dladla: traditionally

Lindi Ndebele-Koka: I have a time thing.

Jabulile Christina Dladla: okay perfect sorry I get carried away.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: So basically this part is talking about traditional SEO. I've already explained that. Now you're asking what is SEO? This is explaining I don't need to go through all that. It's basically explaining what SEO does. And this is explaining what AI SEO is all about. What I just said. So what I've just said, I've just summarized this page and we are done. So we are on SEO. I've explained SEO institutional voice. This is you now. This is powerful. This is your photo. It's going to be replaced by your phone. Institutional voice and executive visibility. The chief executive's voice as one of the academy's most valuable marketing assets. We don't separate the CEO and these are all your photos. The chief executive's voice.

01:15:30

Jabulile Christina Dladla: Read it. We don't separate the CEO. And you have to

Lindi Ndebele-Koka: Um so so maybe here we can add executive

Jabulile Christina Dladla: be

Lindi Ndebele-Koka: visibility institutional voice but it should also add um me and the team you know maybe just say essay from academic

Jabulile Christina Dladla: yes

Lindi Ndebele-Koka: team

Jabulile Christina Dladla: 100%. But in that team,

Lindi Ndebele-Koka: start with me and then the team.

Jabulile Christina Dladla: Exactly. Exactly. Yeah.

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: 100%. So, this is self-explanatory. We don't need to Yeah. Yeah. Yeah. The 90-day activation self-explanatory. LinkedIn speaking engagement. This will be your photo. I saw a photo of you at uh Empower Empower Youth. I'm going to grab it from LinkedIn. It's a beautiful photo of you there. You I'm going to grab it. I'm going to share it with you to approve.

01:16:31

Jabulile Christina Dladla: I know you might have other photos, but the empower youth photo is the best. Yeah, everything on that photo is great. It's beautiful. It's lit properly and it's going to replace this one here.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: So, speaking

Lindi Ndebele-Koka: And we have other images of at

Jabulile Christina Dladla: engage,

Lindi Ndebele-Koka: um at fame week, you know,

Jabulile Christina Dladla: oh yes, frame week is great.

Lindi Ndebele-Koka: with Cindy and and CL.

Jabulile Christina Dladla: Excellent. Excellent. So we add all that there. So we are done with uh institutional voice content marketing. I love this uh storytelling multiformat publication strategy that treats suffer at the industry's most authoritative source. The editorial engine blog posts uh AI will be writing blog posts for us. Um we QC them of of course AI writes faster. If you are to see to write 20 articles she can be slow uh but AI systems will be writing blog post for us. So the five pillars skills and be AI and post sustainable production industry commentary career path stories cinematic not corporate.

01:17:44

Jabulile Christina Dladla: So it's basically articles and podcasts that we shall be catching on multiformat publication podcast we have to take to uh create so create our own in-house podcast we have to you know uh stud doesn't even cost a lot it's just microphones cameras raw and weekly articles 1,500 to 500 word deep dives into industry topics uh monthly podcast 45 to 60 minute long short form, long form cuz our

Lindi Ndebele-Koka: Yeah, we can we can also get a trainy do podcast because we

Jabulile Christina Dladla: our Exactly

Lindi Ndebele-Koka: have we we have access there.

Jabulile Christina Dladla: that exactly we

Lindi Ndebele-Koka: We have access to the studio.

Jabulile Christina Dladla: can.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Excellent. Excellent. So we are done with visibility. Let's quickly move to the growth engine. Click on growth engine. where revenue is generated and impact is I trust me I know the way the revenue generated it sounds hectic not so professional for an NPC we can phrase it the best way you want it phrased because it sounds more like we are for profit uh but yeah we can always phrase

01:18:56

Lindi Ndebele-Koka: Yeah. I mean I mean we are an NPC so there's obviously two

Jabulile Christina Dladla: it

Lindi Ndebele-Koka: aspect to us you know revenue generating and then there's also you know the NPO stuff that that we do

Jabulile Christina Dladla: Oh,

Lindi Ndebele-Koka: but because our clients obviously pay us

Jabulile Christina Dladla: excellent. So, so the phrasing work excellent.

Lindi Ndebele-Koka: the admin fee Hey.

Jabulile Christina Dladla: Ah, so that's perfect sis. So, explore the growth sections aentic AI engine. I've already five autonomous workloads driving a weekly marketing cadence. I already explained that to you. B uh BBE and skills levy. You taught me that. I learned it from you. Um partnerships and PR self-explanatory competitive positioning. Yeah. So I didn't want to bombard you with text. Here you'll be cruising through. The only part I've already explained is the agentive AI engine.

Lindi Ndebele-Koka: Yeah,

Jabulile Christina Dladla: So there certain sections whereby you don't need too much text.

01:19:55

Lindi Ndebele-Koka: we can can explain that.

Jabulile Christina Dladla: Yes.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Yes. So we are on growth engine. We have touched on this. Now we have touched on the yeah partnership

Lindi Ndebele-Koka: That's fine. That that I I've got

Jabulile Christina Dladla: P um building the broadcast call Suziki partnership with

Lindi Ndebele-Koka: I will send you I will I will also send you our

Jabulile Christina Dladla: NIVE.

Lindi Ndebele-Koka: um list of partnerships.

Jabulile Christina Dladla: Ah, perfect,

Lindi Ndebele-Koka: Yeah, you still have men here.

Jabulile Christina Dladla: perfect. Yeah,

Lindi Ndebele-Koka: Please look.

Jabulile Christina Dladla: don't worry.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Don't worry. I know. Uh, Viva, women empowerment. Viva women empowerment. So, don't worry. We'll fix that. But here we have a beautiful lady and a guy shaking hands. So, we'll put more of that.

Lindi Ndebele-Koka: So that will be you and me.

Jabulile Christina Dladla: Yes,

Lindi Ndebele-Koka: We have

01:20:49

Jabulile Christina Dladla: 100%.

Lindi Ndebele-Koka: nice

Jabulile Christina Dladla: Exactly. How could I use those ones as well? Yeah. So that we make it more natural. Yeah. Real

Lindi Ndebele-Koka: on partnerships. I mean, yeah,

Jabulile Christina Dladla: realistic.

Lindi Ndebele-Koka: I'll send you a list. We've got surface partnership IPO real real

Jabulile Christina Dladla: Excellent. Excellent. Sis,

Lindi Ndebele-Koka: partners. We've got I'll send you a list you can

Jabulile Christina Dladla: perfect. I'll be adding all that. Then

Lindi Ndebele-Koka: include. Those are our strategic partnerships.

Jabulile Christina Dladla: strategic

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: alliance development, co-branding agreements, Netflix, Suzuki. AI is yeah self-explanatory. Um so we have touched on this uh competitive positioning six dimensions on which Sappa wins. This is very good. Uh go through it also in detail. The six dimensions on which Sappa wins the room. uh is explaining the set affluence the NPC integrity be all the the advantages agend that we have that are going to make us to be competitive yeah

01:21:49

Lindi Ndebele-Koka: Cool.

Jabulile Christina Dladla: the six dimensions we are compliant with the setter the be mechanics the advantages that you explained to me last time whereby you know that the companies they don't want to do all that and we do that on their behalf uh market leadership you know yeah so that is the six that we are done with growth engine.

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: Now the last part before the smart tools is the delivery you know the delivery pillar we need every I've already explained this in advance measurable accountable result that drive the cutings forward community engagement AI curriculum and KPI tracking we have to as a matter of agency with your board sis Lindy you have to have an AI curriculum that's a must have you don't even need to debate about that you need to implement ASAP because

Lindi Ndebele-Koka: you have there.

Jabulile Christina Dladla: Yeah, the AI curriculum.

Lindi Ndebele-Koka: Which one is that?

Jabulile Christina Dladla: AI curriculum. Yeah, you have to put it in your curriculum now and you if it's not there,

Lindi Ndebele-Koka: Okay.

01:22:54

Jabulile Christina Dladla: you are late. So with your board, we need to treat this as a separate thing. Um yeah, we need to it's new in the sense that it's self-taught via online classes and I've gone through those classes myself already and um you need to introduce it as um it can actually grow big in the sense that you discover that the AI curriculum not only focuses on your staff. It's a curriculum that works also for productions. How can they inject AI into their workflows? You discover that this is something you can offer professionally in collaboration with brands that offer success certification. So nowadays every institute be it training in film be it agriculture be it food be it mining AI curriculum is a must have because it's here already and it's happening. So explore the delivery sections I've explained to you already. will put all photos there. Uh yeah and then that's the delivery. So delivery is talking about also the community the alumni the community mesh year one you had two to three trainees um yeah the ACCE alumni as we shared with me last time from graduate to mentor we spoke about that last time we go to the implementation three track I've already spoken of imp that's why I'm moving fast here yeah that we need to measure the time the implementation strategy.

01:24:34

Jabulile Christina Dladla: You don't speak of a strategy without speaking of implementation and you don't speak of implementation without speaking of delivery. So AI curriculum is what I was just talking to you about the only film academy in South Africa training the post-p production hiring cycles of 2026 a masterclass module on generative AI tools VO cling hilu and equivalent platforms positioned as a curriculum uh differentiator that's what I was speaking about why are we saying the only one because we will be the only one actually properly teaching AI as a curriculum as well with the focus on film using these AI tools and more that we are going to be adding. So this is the tech behind the AI master classes. Um I have to you didn't speak about it in your presentation to me but I had to highlight it on our Monday meeting that it shall be there. So this is explaining in detail about the master classes as well. Um yeah the curriculum evolution and yeah so the delivery then the how do we measure KPI dashboard I spoke about the KPI the numbers reported every quarter this uh we have uh the senotans placements done blog traffic uh you

this Lindy LinkedIn this is a CEO also it's part of the measuring stuff that we are doing for the CEO skills levy client

01:26:10

Jabulile Christina Dladla: uh the delivery of the measurement framework itself um yeah and then last is the budget I didn't put figures on the budget because it's an ongoing thing that we're still doing all those things digital infrastructure they cost money to do and we'll be

Lindi Ndebele-Koka: Uh guys,

Jabulile Christina Dladla: facing

Lindi Ndebele-Koka: I saw a 2.4 million somewhere.

Jabulile Christina Dladla: Oh,

Lindi Ndebele-Koka: Ah,

Jabulile Christina Dladla: okay. Let me scroll up.

Lindi Ndebele-Koka: there somewhere I saw I saw a figure.

Jabulile Christina Dladla: Uh, I think we were trying to say how much money you save by introducing this. Okay, let me Oh, where's the 2.4 days?

Lindi Ndebele-Koka: So this is

Jabulile Christina Dladla: Yes. Yes.

Lindi Ndebele-Koka: autoi.

Jabulile Christina Dladla: But I'm trying to look at the 2 something million that you were saying. I didn't put any figures here. uh initially I'd put figures not for it to be implemented immediately though but just to guide but there's no the budget is without figures uh deliberately because we are still more like focusing on subscription running

01:27:21

Lindi Ndebele-Koka: Just

Jabulile Christina Dladla: and building this um and yeah it's still a work in progress but I did send you the sin uh budget as a as a separate thing So this summarizes all the stuff that we're talking about. I just want to quickly sum close by talking about the smart tools. Smart tools hub is basically the skill level calculations just for people.

Lindi Ndebele-Koka: What is this?

Jabulile Christina Dladla: Okay. uh is to calculate for a production house to calculate their skills levy skilled levy calculator um calculate your mandatory skills development levy and discover how to recover up to 7% of your contribution through strategic training partnerships um is talking about let's say you put you see what I'm doing what if I click put it

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: here automatically you get this. If I put it here auto it's a yeah it's like a it's like a calculator.

Lindi Ndebele-Koka: Okay. Okay.

Jabulile Christina Dladla: Yeah.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: So you can play around with it and see more what it does.

01:28:37

Jabulile Christina Dladla: Yeah. And then be either around. Yeah. Just to for one to have a rough estimate. Yeah.

Lindi Ndebele-Koka: And this I mean this obvious is would be our back

Jabulile Christina Dladla: semi. No,

Lindi Ndebele-Koka: end for

Jabulile Christina Dladla: no. This is front end schools for production houses.

Lindi Ndebele-Koka: for our clients for production houses.

Jabulile Christina Dladla: Yeah.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: Yes. We have given our our new SA fuel academy website. It's going to have smart two so that they actually know their annual SDL contribution roughly. Yeah. It's just free for them.

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: Yeah. It's front end. So eco steward roy calculator uh production days if you put it yeah it's like a rough calculation to say if we have got 11 10 productions carbon emission saved uh people want love statistics. for this if we have got a total of um uh let's say 30 as far as

01:29:51

Lindi Ndebele-Koka: Yeah, I mean I mean when you do this presentation,

Jabulile Christina Dladla: G.

Lindi Ndebele-Koka: Belinda will be there and um she can also share what

Jabulile Christina Dladla: Yes.

Lindi Ndebele-Koka: what kind of instruments they

Jabulile Christina Dladla: Yes.

Lindi Ndebele-Koka: have.

Jabulile Christina Dladla: Excellent. Excellent. So yeah, and that's that's that's about it. Um

Lindi Ndebele-Koka: Okay. And then um just just maybe this as an

Jabulile Christina Dladla: um

Lindi Ndebele-Koka: example. So for this presentation in this work that that you've done this this is 8,000 for now.

Jabulile Christina Dladla: 8,500.

Lindi Ndebele-Koka: Okay. And then what are we looking at in terms of subscription?

Jabulile Christina Dladla: Okay, thank you for raising that. Our core subscription sis Lindy is 4,500 per month um for the outra cuz as we are building agendic workflows it cost us 4,500 per month. It includes generating also all those assets. Uh we're going to be generating video assets anything that we we there's no need for us to have a stock footage account.

01:31:07

Jabulile Christina Dladla: We generate our own stock. We can actually generate you. Let's say we don't have you speaking anywhere. We can generate you by using your photo and we place you somewhere. So it's 4,500. So out of that 8,500 that you are paying uh immediately when we pay like now 4,400 is going towards the agentic subscription of the tools that we use to build all these smart tools all these dashboards cuz yeah all in the old school this was you were not supposed to be speaking with me you were supposed to be speaking with an agent that is made up of 50 employees but now I'm white myself I'm able to sit on my computer and I hire these 50 employees on behalf of Sappa and they work for Sappa. So I'm your supervisor to 50 employees you now have by making a subscription of 4,500 a month. Now apart from that 4,500 a month that is just the stuff that you have hired. You have built platforms, you have built websites, you have built uh I'm um it's

01:32:15

Lindi Ndebele-Koka: Do I need 50 people?

Jabulile Christina Dladla: not I'm just giving you as an example.

Lindi Ndebele-Koka: Just an example.

Jabulile Christina Dladla: We we are not we are not limited. I'm I'm saying there's a bot there's an agentic for your LinkedIn post. There's building the back end out of these 15 a lot is back end. And you don't see that there's there's a there's an aetic AI that is sitting to monitor security only security it's back end you've discover when we have when I say 50 40 are back end you don't see that all this inter clicking clicking that is happening even on our we are on zoom right now there's a bot that is recording this meeting and writing notes for me to say you spoke with sis Linda about ABC D it's happening in our in our day day but now when we pay for a proper subscription is tailor made it's custom made specifically for us it knows our own ecosystem it knows our schedules etc so it's both when I say 50 front end that you see might be five the rest are back end there when back end is the most complex to make sure that our web so 4500 for that subscription number one number two when we create a platform like a website or an up it's it it stays somewhere it does not float in the cloud there's a subscription for that on vessel in cloudflare where our

01:33:40

Jabulile Christina Dladla: SF I don't know where the SF human academy lives right now is it on Afro host is it on god daddy is it on blue ice where does it live so out of all the other platform that websites can live on a platform that is got popular stuff on it people creating profiles It can't just go and live at a funny uh afro host uh free or cheap hosting. It has to live in a secure platform. So Cloudflare subscription which is 450 per month 450 rounds and vessel for security which is 350. So all in all I just put all these other other subscript are small small 250 300 I just sum them up at 2,500 for a secure platform. uh but the more we grow we will be adding security features. So it's 4,500 plus the 2,500 cost which is on a monthly basis. But the more we go to AI curriculum that's a different budget all together. But the essentials right now is the 4,500, the 2,500 and highspeed internet of course that I pay for separately uh to make sure that cuz when the moment you employ these agendic systems, they require highspeed internet minimum 100 Mbps 100 megabits per second.

01:35:07

Lindi Ndebele-Koka: Yeah,

Jabulile Christina Dladla: Yeah.

Lindi Ndebele-Koka: for now I mean um I think we are on XLO some of our stuff. Yeah.

Jabulile Christina Dladla: for marketing. Yes,

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: but I'll need to know the actual it's it's like it's highly technical. I'll need to know the the native CDN you are on on Exil.

Lindi Ndebele-Koka: Okay. Yeah.

Jabulile Christina Dladla: Yeah.

Lindi Ndebele-Koka: Know I mean if if we when we sign the contract, we'll give you all the information. I've got an IT company that is helping me at the moment just for 3 four months to streamline everything.

Jabulile Christina Dladla: Excellent.

Lindi Ndebele-Koka: So they will Yeah.

Jabulile Christina Dladla: So, I'll be able to work with your IT company and make sure that our our back end Yeah, I think I I'll click more because they know more of the back end.

Lindi Ndebele-Koka: Yep.

Jabulile Christina Dladla: When you say it, the it they deal more with backend stuff which you as CEO might not be knowledgeable of. Yeah.

Lindi Ndebele-Koka: Yeah.

01:36:09

Jabulile Christina Dladla: So this is where we are and what we have built for you sis in actual uh industry rate it should cost you a minimum of 150,000. So when you say 8,500 including the senance prototype,

Lindi Ndebele-Koka: Eat.

Jabulile Christina Dladla: it's me telling you that the industry has changed. If you go to an ad agency, they're going to quot you a minimum of 150,000. But you have this all put together with a working prototype at 8,500 just to prove to you that the same work that can be done by by AA agency which has got an office in Sanon can now be done by White Mo who's a freelancer working in Roport on a laptop only with a subscription of 4500 and a storage of 2500. is able to duplicate the same work that is being done by an agent. That's the power of AI. That's the new norm that we're now living in. So the board should not say why are we working with a freelancer when there's a whole agency we can work

01:37:20

Lindi Ndebele-Koka: So basically you are saying all of this um is going to cost

Jabulile Christina Dladla: that

Lindi Ndebele-Koka: me 6,000 a month.

Jabulile Christina Dladla: the subscriptions.

Lindi Ndebele-Koka: The

Jabulile Christina Dladla: Yes. And that subscription is coming with Yeah.

Lindi Ndebele-Koka: subscription

Jabulile Christina Dladla: This is excluding my fee. Of course, I'm talking of subscriptions.

Lindi Ndebele-Koka: Yeah, this is excluding the which fee the the 85 or

Jabulile Christina Dladla: Okay. When I said 8, okay, I now know where the confusion is. Um the 85 cis is just for work done up to now.

Lindi Ndebele-Koka: Yeah. Yeah.

Jabulile Christina Dladla: This is once off.

Lindi Ndebele-Koka: For this for this

Jabulile Christina Dladla: Yes, it's done.

Lindi Ndebele-Koka: work.

Jabulile Christina Dladla: It's not like a monthly. There's no monthly retainer there. If you decide to work with another freelancer or agency,

Lindi Ndebele-Koka: Okay.

Jabulile Christina Dladla: it's fine. This is just a once off of work that has been done for the building this and doing all these meetings, building the strategy itself.

01:38:20

Jabulile Christina Dladla: But you are asking on the way forward or that will properly quot you that it's a it's a that's why I said I didn't put figures on that

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: thing uh because I need to know I now need to know have more information I have to on board security features I but it won't be my my

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: my fee and the subscription fee I think per month. Um, subscriptions we spend on 6K. Uh, I can put a 15K, but it's flexible. You know, we have to talk it out, you and I, and agree on what works. I need to know your budget on marketing. Uh,

Lindi Ndebele-Koka: Yeah. So, so when you say fee,

Jabulile Christina Dladla: yeah,

Lindi Ndebele-Koka: that should be a once off fee for building everything.

Jabulile Christina Dladla: the fee

Lindi Ndebele-Koka: Yeah. What I'm saying that should be a once

Jabulile Christina Dladla: Yes, it's a once off,

Lindi Ndebele-Koka: off.

Jabulile Christina Dladla: but you have got these platforms that we are this digital guys that that work for you.

01:39:30

Jabulile Christina Dladla: It's a it's a monthly subscription.

Lindi Ndebele-Koka: Yeah.

Jabulile Christina Dladla: It's like us paying for a for

Lindi Ndebele-Koka: What I'm saying is that there will be a once off for building this and then

Jabulile Christina Dladla: me for building this and then

Lindi Ndebele-Koka: moving forward then there'll be a subscription fee of 6,000.

Jabulile Christina Dladla: yes that's what

Lindi Ndebele-Koka: Okay. All right. Okay.

Jabulile Christina Dladla: I

Lindi Ndebele-Koka: I just want to understand because yeah the board doesn't

Jabulile Christina Dladla: yes actually this is the cheapest because why am I saying so even

Lindi Ndebele-Koka: flip.

Jabulile Christina Dladla: Even myself I'm able to cut on cost because I'm I have 20 bots that are that scrutinize SAM Academy for me. They scrutinize and said they went on your LinkedIn, they went on Facebook and say we can do it better by doing this and that and that and that. So you have got PhD holders at our disposal.

Lindi Ndebele-Koka: Oops.

Jabulile Christina Dladla: We have Yeah. that are able to accurately define a proper strategy with metrics, not like guesswork.

01:40:33

Jabulile Christina Dladla: You you you you release those agentic AI, they search and they bring up these powerful results. So, it's a hybrid workflow. It is me working with your agentic guys that I have now customized to work specifically for the Saf Academy and comprehend what the Saf Academy does. So that 6,000 of worth of subscription behind the scenes see it as you having unlimited number of employees that are digital. If I if you if I say 50, that's too much. It's up to you. If you say we want 10, it's like you driving a car that has got 400 limit. You can drive 200, you can drive it's it's up to you. I'm just trying to tell you the power that you now have by that subscription. You have the same power of an agent that has 200 employees packed within that 6,000. So you discover that when I when we do break down on budget, I'll break it down some more to say what really are you paying for.

01:41:45

Jabulile Christina Dladla: You see?

Lindi Ndebele-Koka: Okay. So, yeah,

Jabulile Christina Dladla: Yeah.

Lindi Ndebele-Koka: I think I'm Definely. Um, okay. So, we'll conclude this on Monday. I will I mean I'll have to pay for for what the work that we've done now. I'm just running my my daughter is is um is supposed to go to the airport and so let's let's conclude on

Jabulile Christina Dladla: Oh, I see. I see. So, we Okay,

Lindi Ndebele-Koka: Monday.

Jabulile Christina Dladla: cool. Uh, so it's the the 8,500 uh uh invoice that I sent. I didn't need to make a presentation out of it because that's the presentation that I've just done. Uh I think yeah yeah it explains all the banking details everything are there and if we can process it early it actually help so that we wind off um this strategy.

Lindi Ndebele-Koka: Yeah. Okay.

Jabulile Christina Dladla: Yeah.

Lindi Ndebele-Koka: All right.

Jabulile Christina Dladla: Right.

Lindi Ndebele-Koka: Thank you. Thank you so much.

Jabulile Christina Dladla: most well consistent.

Lindi Ndebele-Koka: Thanks. Bye.

Jabulile Christina Dladla: Yeah.
